QUESTION 4

A customer wants to access points in the CEO's office to have different usernames and passwords for administrative support than the other access points deployed throughout the facility.

Which feature can be enabled on the WLC and access points to achieve this criteria?

- A. 802.1x supplicant credentials
- B. HTTPS access
- C. local management users
- D. override global credentials

Correct Answer: C

You can configure administrator usernames and passwords to prevent unauthorized users from reconfiguring the switch and viewing configuration information. This section provides instructions for initial configuration and for password

recovery.

You can also set administrator usernames and passwords to manage and configure one or more access points that are associated with the switch.
