QUESTION 1

The network operator asks you to change the config setting on one specific host. All 300 hosts are managed with Puppet. Which action results in the requested change?

A. This is an unsupported feature of Puppet, and Chef or Ansible must be used to make this change.

B. Go to that host and make the config change. Puppet sees the local override and skips that part.

C. Add an if statement to the Puppet manifest, and add specific config settings, in case Puppet is running on that host.

D. Add a node-based variable lookup override in Hiera, so that if Puppet runs on that host, it takes the variable from Hiera.

Correct Answer: D

Reference: https://docs.puppet.com/puppet/4.9/hiera_use_function.html#merge-behaviors

QUESTION 2

Which concept should you use whet trying to improve a frequently repeated and predictable manual process?

A. scalability

B. lifecycle management

C. deployment

D. orchestration

E. automation

Correct Answer: E

Manual processes often result in delays in locating archived specimens for add-on or reflex testing. One way to reduce or eliminate potential workflow disruptions is to automate storage and retrieval.

QUESTION 3

After completing the OCS setup wizard, the configuration does not get applied. Which two log files should you check to determine the errors that occurred? (Choose two.)

A. /var/log/node_config_state.log

B. /var/log/platform_services.log

C. /var/log/ansible.log

D. /var/log/messages.log

E. /var/log/controller.log

Correct Answer: BC

Step 5 Complete the setup wizard:

Click Submit Cluster Configuration.

If configuration does not complete:

Check ansible.log and platform_services.log (located in the /var/log/ directory) to determine the errors that took place and make the necessary fixes.

QUESTION 4

You have routers in a simulation, and you have a controller that exists on another virtual machine on the same VMware ESXi host. Which two VIRL facilities can you use to create a common subnet between them? (Choose two.)

A. a Linux server acting as a jump-host

B. a Layer 3 external network

C. shared flat management network

D. the management LXC (Linux Container)

E. a Layer 2 external network

Correct Answer: CE

QUESTION 5

Which Linux command gives you an overview of all currently running processes on the system?

A. print all

B. ps aux

C. iostat

D. star all

Correct Answer: B
