QUESTION 1

What is the role of the NSO ConfD engine for network applications that are deployed in multivendor environments?

- A. ConfD provides a repository for configurations that are used in automated provisioning of devices after they are powered on.
- B. ConfD automatically generates network configurations based on network service definitions.
- C. ConfD maintains a database that represents the operational state of a network and provides YANG-based management interfaces for use by external systems.
- D. ConfD provides a library of common configuration tasks that can be quickly adapted for use on a variety of multivendor devices.

Correct Answer: C

QUESTION 2

How do you access the APIC-EM Grapevine developer console?

- A. `https://controller IP address>/devconsole`
- B. `https://controller IP address>:41000`
- C. `https://controller IP address>/grapevinedev`
- D. `https://controller IP address>:14141`

Correct Answer: D
