QUESTION 1

An administrator is trying to collect metadata information about the traffic going across the network to gam added visibility into the hosts. This Information will be used to create profiling policies for devices us mg Cisco ISE so that network access policies can be used.

What must be done to accomplish this task?

A. Configure the RADIUS profiling probe within Cisco ISE

B. Configure NetFlow to be sent to me Cisco ISE appliance.

C. Configure SNMP to be used with the Cisco ISE appliance

D. Configure the DHCP probe within Cisco ISE

Correct Answer: D

QUESTION 2

Which default endpoint identity group does an endpoint that does not match any profile in Cisco ISE become a member of?

A. Endpoint

B. unknown

C. blacklist

D. white list

E. profiled

Correct Answer: B

If you do not have a matching profiling policy, you can assign an unknown profiling policy. The endpoint is therefore profiled as Unknown. The endpoint that does not match any profile is grouped within the Unknown identity group. The endpoint profiled to the Unknown profile requires that you create a profile with an attribute or a set of attributes collected for that endpoint.
