QUESTION 1

What three pieces of information are required to be entered for the Session Manager to be installed and synchronized with System Manager? (Choose three.)

- A. System Manager IP Address
- B. Session Manager Security Module Address
- C. System Manager FQDN
- D. DNS Server Address
- E. Enrollment Password

Correct Answer: ACE

QUESTION 2

What are two reasons for creating a network location? (Choose two.)

- A. Locations are used to implement Call Admission Control.
- B. The location of a caller is used to determine which Session Manager will process the request.
- C. Locations are used to limit the number of users that may register to the session manager specific physical location.
- D. Session Manager uses the termination location of a caller to determine which dial patterns to look at when routing the call.
- E. Session Manager uses the origination location of a caller to determine which dial patterns to look at when routing the call.

Correct Answer: AE

QUESTION 3

A technician is tasked with moving a user from one redundant Session Manager pair to another. Which sequence describes the steps that should be taken?

- A. Go to the User's User Profile. Select different Session Manager instance from the Primary Session Manager and Secondary Session Manager lists.
- B. Go to the user's User Profile. De-select the current community. Select the new community.
- C. Navigate to the Communities page. Select the Community into which the user will be moved. Select the user from a drop down list to add the user to the community.
- D. Go to the Locations page. Select a location, define it as a Primary community and add the user. Select another

location, define it as a Secondary community and add the user.

Correct Answer: A

QUESTION 4

When you upgrade Session Manager you had been using the hardware SM-100, the network connection of the SM-100 must be moved to which port on the Session Manager server?

- A. eth2 port, labeled "2"
- B. eth2 port, labeled "3"
- C. eth0 port, labeled "1"
- D. eth0 port, labeled "0"

Correct Answer: B

QUESTION 5

Which statement expresses the relationship between users, roles, and groups?

- A. Roles grant permissions. Users are not directly assigned roles but inherit them through belonging to groups.
- B. A group is a name for a collection of roles and each role is assigned its own administrator user.
- C. Users can belong to groups for easy management and can be assigned roles which grant them access rights.
- D. Groups and roles directly correspond to sections of the SMGR Web Console navigation pane and, unless a user belongs to a specific role group, they cannot access the corresponding management screens.

Correct Answer: C
