QUESTION 1

A customer has a single site with 2,500 users. They want a solution that provides hardware redundancy. The failure of a single component should not be service impacting.

Given these parameters, what would satisfy their request?

- A. Communication Manager Duplex
- B. Communication Manager S8300
- C. Communication Manager Simplex with Survivable Core
- D. Communication Manager Simplex with Survivable Remote

Correct Answer: A

QUESTION 2

One of the requirements of a proposal you are working on, is the ability to query an Active Directory database for contact information from the customer's Avaya 96XX SIP Phones.

To support this functionality, which component must be included in your solution?

- A. Avaya Aura Devices Services
- B. Communication Manager
- C. A DHCP server
- D. System Manager

Correct Answer: D

QUESTION 3

If a customer has an Avaya Aura 7.0 and shuffling is turned on within Communication Manager, which statement describes the media processing resource (DSP) requirements for a two-party call originated by a SIP station and terminated by an H323 IP Trunk being recorded?

- A. Multi-party (i.e. 3-party or greater) calls cannot shuffle, and require media-processing channels for the entire call.
- B. SIP-SIP two-party calls will use SIP Direct Media, so no media-processing channels are required for this call.
- C. This call cannot shuffle, and one media-processing channel is required for the entire call.
- D. This call will shuffle after initial call set-up; i.e., one media-processing (DSP) channel is required for the first 20 seconds of the call, for each party.

Correct Answer: C

QUESTION 4

A customer with an Avaya Aura Platform requires survivable remote capabilities at their new branch location. The new branch location must also support five analog telephones and two T1 trunks.

What will address these requirements?

- A. Communication Manager and Session Manager on Appliance Virtualization platform with local data switch
- B. Communication Manager on Appliance Virtualization platform with local data switch
- C. G430 with embedded S8300 with needed media modules
- D. G450 with embedded S8300 with needed media modules

Correct Answer: A

QUESTION 5

You are adding a remote location to a Communication Manager(CM) 6.2 customer with a duplex system, and G650 media gateways at the core. You want to use H.248 gateway(s). The location will have 30 IP sets, 30 analog sets, and 40 DCP sets. You know that the base G430 gateway includes 32 Touch Tone Receivers (TTRs), and the G450 gateway includes 64 TTRs.

To support all of the sets going off-hook at the same time, how many TTRs will be required, and which hardware would be required to provide the TTRs?

- A. 100 TTRs using one G450 and twoTTR expansion modules
- B. 70TTRs using two G450s
- C. 30 TTRs using one G430 or one G450
- D. 70TTRs using one G430 and threeTTR expansion modules

Correct Answer: D
