## QUESTION 1

A customer wants to ensure that their remote workers who access the Avaya core are authenticated by the Avaya Session Border Controller for Enterprise (SBCE).

What is the recommended location for the SBCE?

- A. On the same virtual instance with Session Manager
- B. In the Internet Service Provider network
- C. Behind the firewall in the customers enterprise
- D. In the customer's DMZ

Correct Answer: C

---

## QUESTION 2

A customer has an existing single-location Communication Manager solution with G650 gateways and ISDN trunks. You have been asked to design a new location for 200 users. The new location will support IP telephones, basic emergency calling to public safety agencies, and local PSTN trunks. There is a requirement for Standard Local Survivability.

Which design meets the customer's requirements?

- A. G430 gateway, IP telephones, MM711 analog media module, and analog central office lines
- B. G450 gateway, IP telephones, MM716 analog media module, and analog central office lines
- C. G430 gateway, IP telephones, MM710 DS1 media module, and an ISDN-PRI from the service provider
- D. G450 gateway, IP telephones, MM710 DS1 media module, and an ISDN-PRI from the service provider

Correct Answer: A

---

## QUESTION 3

You are adding 1400 users to an existing Avaya Aura communication core- The customer wants the same services for all users, but with this expansion there is not enough bandwidth for audio and video calls for all.

If the bandwidth parameter is set lower than the minimum video requirement, what will happen to users initiating audio and video calls?

- A. Audio calls will connect but video calls will not initiate.
- B. Audio and video calls will connect for some users.
- C. Audio and video calls will connect for all users.
- D. Audio calls will connect and video calls will connect as audio calls.

Correct Answer: B

---

## QUESTION 4

You are creating a new Communication Manager design. You have included Avaya provided servers with G450 gateways. The solution requires 200 - H.323 telephones. Trunk service from the PSTN will be IP trunks. Shuffling will be enabled. They have also requested call recording via Device Media Call Control (DMCC) application programming interface.

To record all IP endpoints simultaneously, how many DSP resources are required?

- A. 800 DSP resources
- B. 600 DSP resources
- C. 400 DSP resources
- D. 200 DSP resources

Correct Answer: A

---

## QUESTION 5

You are explaining to your customer that Avaya Aura Media Server (AAMS) has been adopted by Communication Manager, but is not a direct replacement for media gateways.

Which two capabilities are supported by the Avaya Aura Media Server? (Choose two.)

- A. TDM interfaces for digital, analog stations and trunks
- B. V.150.1 (Modem-over-IP)
- C. Virtualization
- D. Basic media resource capabilities

Correct Answer: CD
