Correct Answer: D

---

**QUESTION 2**

You are preparing to migrate a customer's legacy voice mail system and are about to install system software onto an Avaya Aura Messaging server. In gathering the required customer data, you realize some information is missing. Which forms or data are required before proceeding?

- A. An Avaya DCT (Data Collection Tool) file should be generated and configured for the new Aura Messaging Server.
- B. An Avaya EPW (Electronic Planning Worksheet) should be completed for the new Avaya A Messaging server and for the existing legacy voice mail system.
- C. You should have the completed planning forms/installation worksheets for System Platform Avaya Aura Messaging.
- D. You should have a customer provided installation data disk for the legacy voice mail system.

Correct Answer: C

---

**QUESTION 3**

Which service will be used to retrieve the voicemail messages from Microsoft Exchange when Exchange is used as the message store?

- A. Auto Discovery Service
- B. Exchanges Web Services
- C. IMAP
- D. MAPI

Correct Answer: B

---

**QUESTION 4**

An end user has a completely functional mailbox but complains that when using Notify Me to phone is configured with a

long distance number, calls are not received. The user is one of the groups of users with this problem. Other users can use long distance numbers for their Notify Me to Phone number successfully. Your testing reveals that the problem is exactly as described using the same long distance number; one user successfully uses Notify Me to Phone and a non working user cannot. What is causing the problem?

- A. The non working users class of service does not allow long distance dialing from the system.
- B. The non working users mailbox configuration is set to disallow long distance dialing from system.
- C. Dialing rules have been configured incorrectly for the system.
- D. The non working users do not have extensions that are configured in the switch.

Correct Answer: A

---

## QUESTION 5

A client wants to add a new set of user mailboxes with support for fax messages and a simple call answering voice message feature set. Which feature license type seats availability would you verify before proceeding with user creation for the system to continue working under the Normal license mode?

- A. VALUE MSG\_SEAT \_MAINSTREAM
- B. VALUE \_MSG\_SEAT\_BASIC
- C. VALUE \_MSG\_1X\_SPEECH\_SEAT
- D. VALUE\_MSG\_SPEECH\_AA\_ENTRY

Correct Answer: A
