QUESTION 1

Refer to the exhibit.

Inbound Infrastructure ACLs are configured to protect the SP network. Which three types of traffic should be filtered in the infrastructure ACLs? (Choose three.)

A. traffic from a source with an IP address that is within 239.255.0.0/16

B. FTP traffic destined for internal routers

C. IPsec traffic that at an internal router

D. traffic from a source with an IP address that is within 162.238.0.0/16

E. EBGP traffic that peers with edge routers

Correct Answer: ABD

With the use of the protocols and addresses identified, the infrastructure ACL can be built to permit the protocols and protect the addresses. In addition to direct protection, the ACL also provides a first line of defense against certain types of invalid traffic on the Internet:

-RFC 1918 space must be denied. (RFC1918 describes a set of network ranges set aside for so- called "private" use.)

-Packets with a source address that fall under special-use address space, as defined in RFC 3330, must be denied.

-Anti-spoof filters must be applied. (Your address space must never be the source of packets from outside your AS.)

QUESTION 2

In a cable HFC plant, what is a modulator?

A. Set top box

B. Diplex filter

C. Local head end

D. Fiber node

Correct Answer: A

QUESTION 3

Which statement about IPv6 security is true?

A. Reconnaissance attacks are easier to do in IPv6 compared to IPv4.

B. IPv6 amplification attacks can happen using IPv6 broadcast address.

C. RA-guard feature is used to block rogue RAs.

D. ICMP policies on firewalls do not need to be changed for IPv6 because ICMP is Layer 3 agnostic.

Correct Answer: C

QUESTION 4

What are the three building blocks of the Cisco VPLS architecture? (Choose three.)

A. L2VPN

B. Ethernet Virtual Switch Interface

C. VLAN Trunk Protocol

D. State Synchronization Protocol

E. Label Distribution Protocol

F. Resource Reservation Protocol

Correct Answer: ABE

QUESTION 5

A network engineer is requested to have load sharing over two links to the same destination prefix. The traffic share for the first link must be two times the traffic share of the second link. Which two protocols can fulfill this requirement? (Choose two.)

A. EIGRP

B. BGP

C. ISIS

D. OSPF

E. RIP

F. IGRP

Correct Answer: AB
