### QUESTION 1

A customer is deploying a new Horizon View Pool which will support workstations deployed using older third-party zero clients. The older zero clients will be used to access a 3D modeling application. Which protocol should the pool use?

- A. RDP
- B. RGS
- C. PCoIP
- D. Blast Extreme

Correct Answer: D

### QUESTION 2

DRAG DROP

A customer has an aging storage array that must be replaced. The array is used by VMware hosts in their data center. The storage array is under warranty, but the hosts are all out of warranty. The customer wants new hardware running Horizon 7, and is open to a hyperconverged solution. The project must take place with minimal-to-no disruption during normal business hours. The CIO states there is a maximum budget of \$600,000 for the project. The IT Director says their UPS units were replaced last year and they don't need to be updated. The existing racks are heavily populated, with limited rack units remaining and no additional datacenter floorspace for another rack.

Match the statements taken from the scenario with its correct design category.

Select and Place:

Customer Statements	Design Category
Storage array is under warranty. Hosts are not.	Risk
Replace aging storage array and VMware hosts.	Requirement
UPS units replaces last year. No update needed.	Assumption
A maximum budget of \$600,000 for the project.	Constraint

Correct Answer:

## Customer Statements

## Design Category

UPS units replaces last year.  
No update needed. Risk

Replace aging storage array and  
VMware hosts. Requirement

A maximum budget of \$600,000  
for the project. Assumption

Storage array is under warranty.  
Hosts are not. Constraint

### QUESTION 3

A company is implementing VMware Horizon View 7 solution. It has created four 500 linked-clone desktop pools to be used by different departments and workers. The company's VDI administrator noticed that Horizon View Composer is showing in error state on the View Admin Web Console. During restart of the Composer service, the service failed to start up again. A decision was made to migrate View Composer to a new server and preserve the linked-clone information.

What three steps are required for the migration? (Choose three.)

- A. Install View Connection Server on the new machine.
- B. Create a new SQL database
- C. Migrate the RSA key constringer.
- D. Configure Horizon View Composer to point to the existing SQL database.
- E. Install the VMware Horizon View Composer service.

Correct Answer: CDE

### QUESTION 4

The IT team for a company wants to deploy VMware Horizon and allow end users to access their Horizon Windows desktops using Windows laptops, Android and iOS mobile phones, and Android and iOS tablets with the following requirements:

- 1.

High data security

2.

Low client bandwidth

3.

Low client processor overhead

4.

Low storage space

5.

High image quality

Which Horizon desktop pool meets these requirements?

A. Instant Clones Refresh OS disk after logoff: enabled Default display protocol: PCoIP Allow users to choose protocol: disabled Adobe Flash throttling: conservative

B. Linked Clones Refresh OS disk after logoff: enabled Default display protocol: Blast Extreme Allow users to choose protocol: disabled Adobe Flash throttling: conservative

C. Linked Clones Refresh OS disk after logoff: enabled Default display protocol: RDP Allow users to choose protocol: disabled Adobe Flash throttling: aggressive

D. Instant Clones Refresh OS disk after logoff: enabled Default display protocol: RDP Allow users to choose protocol: disabled

Correct Answer: A

---

## QUESTION 5

The IT team at a small government organization wants to deploy Windows RDS desktops to their end users. They want the end users' profile and application customization setting preserved. They also want to deploy applications using VMware App Volumes.

What should be implemented to meet requirements?

A. Use Horizon instant clone RDS hosts with User Environment Manager.

B. Use Horizon linked clone RDS hosts with VMware FLEX.

C. Use Horizon instant clone RDS hosts with App Volumes Writable volumes.

D. Use Horizon linked clone RDS hosts with user persistent disks.

Correct Answer: C

Writable volume is a user-specific read-write volume where the user is allowed to preserve application files and user-installed applications, settings, licensing information, and data. A user can have only one writable volume attached at a time to a desktop, but can have multiple writable volumes assigned.
