QUESTION 1

The IT team at a small government organization wants to deploy Windows RDS desktops to their end users. They want the end users' profile and application customization setting preserved. They also want to deploy applications using VMware App Volumes.

What should be implemented to meet requirements?

- A. Use Horizon instant clone RDS hosts with User Environment Manager.
- B. Use Horizon linked clone RDS hosts with VMware FLEX.
- C. Use Horizon instant clone RDS hosts with App Volumes Writable volumes.
- D. Use Horizon linked clone RDS hosts with user persistent disks.

Correct Answer: C

Writable volume is a user-specific read-write volume where the user is allowed to preserve application files and user-installed applications, settings, licensing information, and data. A user can have only one writable volume attached at a time to a desktop, but can have multiple writable volumes assigned.

QUESTION 2

An architect is deploying Horizon 7.0 on vSAN 6.2. The architect wants to take advantage of the erasure coding feature to save disk space. Each host contains 4TB of capacity flash disk. The desktop base image has 2GB of RAM and a 40GB

C: drive. The cluster must support 200 concurrent users.

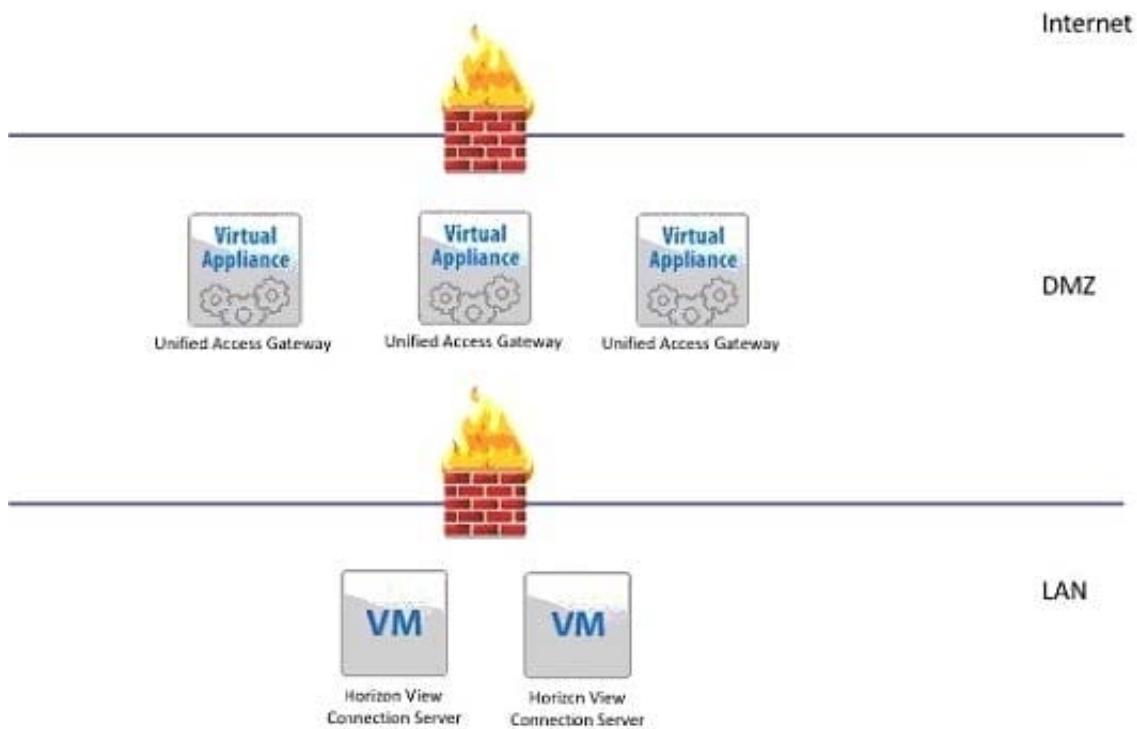

Which two configurations satisfy requirements? (Choose two.)

- A. 4-host cluster, FTT=2
- B. 5-host cluster, FTT=2
- C. 6-host cluster, FTT=2
- D. 3-host cluster, FTT=1
- E. 4-host cluster, FTT=1

Correct Answer: CE

QUESTION 3

A customer would like to implement Horizon 7 using Unified Access Gateway for external access. Referring to the exhibit, which two architectural considerations are required? (Choose two.)

- A. SSL Offloading or Bridging
- B. One-to-one mapping of Unified Access Gateways and Horizon View Connection Servers
- C. Session Affinity Options
- D. DNS Lookup in the DMZ
- E. Unified Access Gateway Pairing to Horizon View Connection Servers

Correct Answer: CE

QUESTION 4

A company is deploying VDI and needs to meet these requirements:

1.
Support a bring-your-own-device (BYOD) strategy
2.
Support external contractors
3.
Support access from anywhere
- 4.

Reduce or eliminate costly desktop and laptop replacement Which two solutions should an architect recommend? (Choose two.)

- A. Deploy Airwatch.
- B. Leverage Horizon 7 clients.
- C. Deploy Horizon 7 Access Point appliances.
- D. Deploy AppVolumes.
- E. Provide Thin Clients to end-users.

Correct Answer: BE

QUESTION 5

A hospital is looking to introduce a new work model. Their goal is to allow doctors and nurses to access care applications more flexibly. An important task is that Android and iOS tablets be allowed for hospital staff. The IT department is faced with the task of executing on the requirements.

The current client environment is:

1.
Physical Windows 7 desktops and laptops
2.
2500 Windows based applications
3.
300 Web based applications, where 200 requires Internet Explorer
4.
Windows applications are managed using Microsoft SCCM

Any solution must be in production within 6 months. IT was approved to start building a non-optimized solution to get things started. At a later date, investments will be spent on optimizing the solution. There is no time for a proper application

assessment and user segmentation, so the solution must support as broad a user base as possible.

The main priorities for the design are:

1.
Time to market
2.
Change as little as possible of existing management processes

What solution would support the main priorities?

- A. Deploy Horizon 7 on vSAN ready nodes. Create full clones Windows 7 VDI desktops and manage applications using the existing Microsoft SCCM solution.
- B. Deploy Horizon 7 on vSAN ready nodes. Create linked clones desktops based on Windows 10 and manage applications using App Volumes.
- C. Deploy Horizon 7 on existing SAN and use Application Publishing to allow access to all Windows applications. Use VMware Identity Manager to allow access to all Web applications natively on the tablets.
- D. Order a new physical SAN and deploy Horizon 7. Use Instant Clones Windows 7 VDI desktops to save SAN storage. Manage applications using Microsoft SCCM.

Correct Answer: C
