## QUESTION 1

What should be verified when configuring a switched port analyzer (SPAN) for AppResponse Xpert? (Select 4)

- A. Only one direction of virtual local area network (VLAN) traffic is included.
- B. All traffic from every server and end point is included.
- C. Traffic before and after a firewall is included.
- D. The SPAN interface isn't oversubscribed.
- E. The interface speed and type.
- F. The color of the ethernet cable.

Correct Answer: ACDE

---

## QUESTION 2

What does the TCP out-of-sequence statistic indicate? (Select 2)

- A. Several paths are used to receive traffic, so packets can be received out of order.
- B. A TCP retransmission when looking at a trace on the sender side.
- C. A TCP retransmission when looking at a trace on the receiver side.
- D. It cannot indicate a TCP retransmission. That is recorded using the TCP retransmission statistic only.

Correct Answer: AC

---

## QUESTION 3

The PathProbe utility in AppTransaction Xpert helps:

- A. Estimate connectivity to capture agents
- B. Estimate hop-by-hop Layer 2 path
- C. Estimate server delay
- D. Estimate bandwidth and latency

Correct Answer: D

---

## QUESTION 4

Netflow insights display

- A. Netflow and monitoring port data merged
- B. Netflow and monitoring port data merged, but only if the "merge netflow and monitoring port data" is enabled in the web user interface configuration pages.
- C. Netflow data only
- D. Monitoring port data only

Correct Answer: C

---

## QUESTION 5

CX-Tracer is an AppResponse Xpert module designed for increased visibility into:

- A. Real-time Citrix decodes
- B. Optimized traffic response times through the Riverbed Steelhead CX model appliances
- C. Front-end request to back-end connection mapping in Citrix XenApp environments
- D. User-to-Citrix desktop mapping in Citrix XenDesktop environments
- E. Citrix desktop server resource utilization measurements

Correct Answer: C
