- A. block only
- B. block and monitor
- C. block and do not monitor
- D. allow only
- E. allow and monitor
- F. allow and do not monitor

Correct Answer: BEF

QUESTION 3

When deploying clientless SSL VPN advanced application access, the administrator needs to collect information about the end-user system. Which three input parameters of an end-user system are important for the administrator to identify? (Choose three.)

- A. types of applications and application protocols that are supported
- B. types of encryption that are supported on the end-user system
- C. the local privilege level of the remote user
- D. types of wireless security that are applied to the end-user tunnel interface

- E. types of operating systems that are supported on the end-user system
- F. type of antivirus software that is supported on the end-user system

Correct Answer: ACE

QUESTION 4

Select and Place:

Drag the correct three access list entries (from the left) and drop them (on the right) in the order that is used when the interface ACL and global ACL are configured. Not all access list entries are required.

implicit deny ip any any global access list rule entry	Target
implicit deny ip any any interface access list rule entry	Target
implicit permit ip any any interface access list rule entry	Target
implicit permit ip any any global access list rule entry	
interface access list entries	
global access list entries	
Implicit permit ip any any from higher security level interface to lower security level interface	

Correct Answer:

Drag the correct three access list entries (from the left) and drop them (on the right) in the order that is used when the interface ACL and global ACL are configured. Not all access list entries are required.

	interface access list entries
implicit deny ip any any interface access list rule entry	global access list entries
implicit permit ip any any interface access list rule entry	implicit deny ip any any global access list rule entry
implicit permit ip any any global access list rule entry	
Implicit permit ip any any from higher security level interface to lower security level interface	

QUESTION 5

Select and Place:

What is the selection hierarchy to which attributes are applied to a clientless SSL VPN user? Drag and drop each attribute policy on the left to the correct priority level within the attribute hierarchy on the right.

Group policy attributes that are attached to the user profile	Highest Priority
User policy attributes	
DAP attributes	
Default group policy attributes	
Group policy attributes that are attached to the connection profile	Lowest Priority

Correct Answer:

What is the selection hierarchy to which attributes are applied to a clientless SSL VPN user? Drag and drop each attribute policy on the left to the correct priority level within the attribute hierarchy on the right.

	DAP attributes
	User policy attributes
	Group policy attributes that are attached to the user profile
	Group policy attributes that are attached to the connection profile
	Default group policy attributes
