### QUESTION 1

Which three options are characteristics of WebType ACLs? (Choose three.)

- A. They are assigned per-connection profile.
- B. They are assigned per-user or per-group policy.
- C. They can be defined in the Cisco AnyConnect Profile Editor.
- D. They support URL pattern matching.
- E. They support implicit deny all at the end of the ACL.
- F. They support standard and extended WebType ACLs.

Correct Answer: BDE

---

### QUESTION 2

Which two Cisco ASA licensing features are correct with Cisco ASA Software Version 8.3 and later? (Choose two.)

- A. Identical licenses are not required on the primary and secondary Cisco ASA appliance.
- B. Cisco ASA appliances configured as failover pairs disregard the time-based activation keys.
- C. Time-based licenses are stackable in duration but not in capacity.
- D. A time-based license completely overrides the permanent license, ignoring all permanently licensed features until the time-based license is uninstalled.

Correct Answer: AC

---

### QUESTION 3

Select and Place:

Drag the correct three access list entries (from the left) and drop them (on the right) in the order that is used when the interface ACL and global ACL are configured. Not all access list entries are required.

implicit deny ip any any global access list rule entry	Target
implicit deny ip any any interface access list rule entry	Target
implicit permit ip any any interface access list rule entry	Target
implicit permit ip any any global access list rule entry	
interface access list entries	
global access list entries	
implicit permit ip any any from higher security level interface to lower security level interface	

Correct Answer:

Drag the correct three access list entries (from the left) and drop them (on the right) in the order that is used when the interface ACL and global ACL are configured. Not all access list entries are required.

	interface access list entries
implicit deny ip any any interface access list rule entry	global access list entries
implicit permit ip any any interface access list rule entry	implicit deny ip any any global access list rule entry
implicit permit ip any any global access list rule entry	
implicit permit ip any any from higher security level interface to lower security level interface
