QUESTION 1

Which statement correctly describes how Cisco Meraki devices behave should they be unable to contact the Meraki Cloud server?

A. The network devices will attempt to establish a connection to a locally hosted database server that has been configured for high availability.

B. The devices may be re-initiated into a backup mode if an administrator manually intervenes using a direct, local connection.

C. The network stops passing traffic across all devices and the interfaces including any connected non-Cisco Meraki devices.

D. The network devices continue to function normally (traffic lows at full rate) but management and configuration functions are interrupted.

Correct Answer: D

QUESTION 2
