QUESTION 1

A business unit requires proprietary data to be protected against a site failure while using the least amount of storage and the least amount of nodes. AN administrator plans to implement a vSAN Stretched Cluster with a RAID-5 policy.

What is the minimum number of data nodes across all sites in this vSAN Stretched Cluster configuration?

A. 4

B. 8

C. 12

D. 6

Correct Answer: B

QUESTION 2

What is the purpose of host rebuild reserve in vSAN?

A. Reserves space in case of single host failure

B. Allocated capacity for vCLS

C. Reconfigures data components

D. Stores vSphere HA heartbeats

Correct Answer: A

QUESTION 3

A customer is running a number of compute-intensive application workloads on their existing 4-node vSAN cluster that has resulted in resource contention. To provide additional compute resources, the vSAN administrator has decided to deploy a new 4-node vSAN compute-only cluster so that a HCI Mesh can be configured.

Which three points would the vSAN administrator need to consider before using this configuration? (Choose three.)

A. The storage policy must be based on the number of hosts within the client cluster.

B. The storage policy is based on the total number of hosts across both client and server clusters.

C. A storage policy of Erasure Coding with FTT=2 would be supported.

D. A storage policy of Mirroring with FTT 1 would be supported.

E. A storage policy of Erasure Coding with FTT=1 would be supported.

F. The storage policy must be based on the number of hosts within the server cluster.

Correct Answer: DEF

QUESTION 4

Which option, if any, is the default option to enable Maintenance Mode on a vSAN host?

A. Ensure accessibility.

B. No data migration.

C. Full data migration.

D. There is no default option. The administrator must select an option.

Correct Answer: D

QUESTION 5

After a recent security assessment, the security team recommended that vSAN encryption be enabled. The vSAN administrator will be adding a Key Management Server to vCenter.

What is a prerequisite to taking this action?

A. IPv6 addressing

B. Proxy server with username and password access

C. Self-encryption drives

D. Cryptographer ManageKeyServer permissions

Correct Answer: D
