QUESTION 1

Which use case is valid for a Stretch Cluster design in a VMware Cloud Foundation Workload Domain?

- A. Application Modernization
- B. Manual Workload Recovery
- C. Hybrid Cloud Management
- D. Planned Maintenance

Correct Answer: D

QUESTION 2

Which two actions are prerequisites for upgrading VMware Cloud Foundation 4 x? (Choose two.)

- A. Validate that all required bundles for the upgrade are downloaded successfully.
- B. Acquire a temp IP range for the new products components deployed during the upgrade
- C. Take a backup of SDDC Manager
- D. Take a snapshot of all workloads running on VMware Cloud foundation
- E. Validate that all required license keys are available for the newer products versions

Correct Answer: AC

QUESTION 3

Which step should be followed to restore SDDC Manager using the OVF tool?

- A. Retrieve the DNS name or IP address of a host in the management Domain
- B. Use the host's DNS name in the host password_vault.json, and this will display the root password
- C. Install the OVF Tool on a system in the VI Workload domain.
- D. Move the SDDC Manager VM into the VI Workload Resource Pool.

Correct Answer: A

QUESTION 4

Which two statements accurately characterize vSphere Pods? (Choose two)

- A. A vSphere Pod is the smallest building block of vSphere with Tanzu that can run containerized applications.

- B. A vSphere Pod can run only one container, and the minimum number of vSphere Pods in a cluster is three pods.
- C. A vSphere Pod is just a VM that runs a minimal version of Photon OS and container runtime on top of it.
- D. A vSphere Pod is a Kubernetes pod that runs on Tanzu Kubernetes Cluster
- E. A vSphere Pod can use normal vSphere Standard Switch and vSphere Distributed Switch

Correct Answer: AD

QUESTION 5

An administrator is required to deploy a new workload domain for a new business unit that must use its own NSX-I instance.

Which two Components will be deployed in the management domain during the workload domain creation? (Choose two.)

- A. NSX-T Manager
- B. Standalone Platform Services Controller
- C. vCenter Server
- D. NSX-T Edge node
- E. Additional SDDC Manager

Correct Answer: AC
