QUESTION 1

A system administrator has been tasked with creating a new network in preparation for onboarding a tenant with the following requirements:

*

Provides a fully routed networking topology

*

Advertises routes via BGP (Border Gateway Protocol)

*

Prevents additional edge gateways from connecting to the network

*

Allow virtual machines to connect to outside networks Which network type will satisfy all of these requirements?

A.

Imported Network

B.

Isolated Network

C.

Direct Network

D.

Dedicated External Network

Correct Answer: D

QUESTION 2

What is the function of vCloud Usage Meter Billing Categories?

A. To indicate which licensing belongs to individual tenants

B. To indicate which VCPP bundle has been detected

C. To indicate which license keys are billable

D. To indicate if consumption is based on vRAM or per OSI/VM

Correct Answer: C

QUESTION 3

A system administrator creates a common catalog to be used by all customers. For availability purposes, the catalog will be consumed by a different VMware Cloud Director instance in a different country.

Which catalog setting enables the catalog to be shared across VMware Cloud Director instances?

- A. Published catalog
- B. Subscribed catalog
- C. Content library catalog
- D. Shared catalog

Correct Answer: D

QUESTION 4

A cloud provider wants to advertise a new service based in the VMware Cloud Director Object Storage Extension.

Which two statements summarize the functionality of this new service? (Choose two.)

- A. It integrates a tenant's AWS EBS buckets into the tenant's Virtual Data Center.
- B. It provides the capability to store and share structured data within the VMware Cloud Director organization.
- C. It is a standalone middleware service that provides S3 compatible storage capabilities accessible via HTTPS.
- D. It provides the capability to store and share unstructured data within the VMware Cloud Director organization.
- E. It offers multiple storage performance tiers to deploy tenant's workloads.

Correct Answer: CD

QUESTION 5

The VMware Cloud Director administrator wants to make sure that the system is able to collect log bundles from all cells at once.

How should the administrator accomplish this goal?

- A. Install vRealize Log Insight agent on each cell to redirect logs to a centralized location.
- B. Configure a syslog server on each of the cells, and request the logs from the syslog server.
- C. Map the log location on the primary cell to a shared folder on each of the other cells in the server group, ensuring they all have read/write rights on the primary.
- D. Make sure the NFS server allows read-write access to the shared location by the root system account on each cell.

Correct Answer: D
