QUESTION 1

Which two options are benefits of Port Resource Pooling? (Choose two.)

- A. allows for increased number of network-requested PDP activations
- B. reduces the number of GGSN initiated deactivate procedure
- C. provides resiliency
- D. reduces the signaling towards the SMSC
- E. reduces the number of inter-SGSN RAU procedures

Correct Answer: CD

QUESTION 2

In which two circumstances is Diameter Peer Discovery needed? (Choose two.)

- A. The Diameter client is rejected by the peer.
- B. The Diameter client must contact a first-hop Diameter agent.
- C. The Diameter agent must reply to the connect request of a Diameter client.
- D. The Diameter agent must search the next agent so that Diameter messages can reach the Diameter server.
- E. The Diameter agent must close the session with a Diameter client.

Correct Answer: BD

QUESTION 3

Into which state does a UE in a GPRS network move after the ready timer expires?

- A. idle state
- B. detached state
- C. suspended state
- D. ready state
- E. standby state

Correct Answer: E

QUESTION 4

Drag and arrange the steps on the left in the correct order on the right that indicates how DPC+ SSN based routing in SGSN is performed on the Cisco ASR 5000.	
SS7 routing domain from the SCCP network is picked and point code in the SS7 RD is available	First
SCCP network in the map-service	Second
SSN service state is in-service in the SCCP network	Third
DPC in the SCCP network is accessible	Fourth

Select and Place:

Drag and arrange the steps on the left in the correct order on the right that indicates how DPC+ SSN based routing in SGSN is performed on the Cisco ASR 5000.	
SS7 routing domain from the SCCP network is picked and point code in the SS7 RD is available	First
SCCP network in the map-service	Second
SSN service state is in-service in the SCCP network	Third
DPC in the SCCP network is accessible	Fourth

Correct Answer:

Drag and arrange the steps on the left in the correct order on the right that indicates how DPC+ SSN based routing in SGSN is performed on the Cisco ASR 5000.	
	SCCP network in the map service
	SS7 routing domain from the SCCP network is picked and point code in the SS7 RD is available
	DPC in the SCCP network is accessible
	SSN service state is in-service in the SCCP network

QUESTION 5

Which two configurations are required for narrow band SS7 configuration in the Cisco ASR 5000 system? (Choose two.)

A. link type configuration in the SS7 routing domain

- B. framing type configuration at the card level
- C. SCCP network association at the port level
- D. lu-PS service association at the port level
- E. peer server configuration at the SS7 routing domain

Correct Answer: AB
