QUESTION 1

A customer has geographically diverse sites and plans to deploy an Avaya ACETM Federation. Their network includes a Communication Server 1000 (CS1000) system running a supported software release, IBM Lotus Sametime, and the associated end-user telephones and clients. When planning the Federation architecture, which is the platform consideration?

- A. An Avaya ACETM Federation requires an AvayaACETMHigh Availability (HA) configuration.
- B. An AvayaACETMFederation requires an AvayaACETMLinux-based hardware platform.
- C. An Avaya ACETM Federation requires a Microsoft Office Communications Server (OCS) serviceprovider.
- D. An Avaya ACETM Federation requires an Application Integration Engine (AIE) server.

Correct Answer: A

QUESTION 2

A customer requires secure-only communication with Avaya ACETM. Which statement describes a supported method to meet the customer requirements?

- A. Disable the root account.
- B. Change the Avaya ACETM OAMP admin password.
- C. Disable the unsecured port for event notification channel on the Avaya ACETM host.
- D. Disable the secured port for secure event notification channel on the AvayaACETMhost.

Correct Answer: C

QUESTION 3

A customer plans to deploy an Avaya ACETM version 2.3 or higher on Windows standalone solution. As part of the definition of the project scope of work, the technician wants to ensure the appropriate operating system is installed on the host server. Which software operating system (OS) is required?

- A. 32-bit Windows OS
- B. 6-1-bit Windows 2008 R2 OS
- C. Windows 2003 OS
- D. 32-bit or 64-bit Windows XP OS

Correct Answer: B

QUESTION 4

A technician has completed the installation and configuration of an Avaya ACETM and IBM Lotus Sametime for an integration solution. The solution includes telephony client presence. Which action should be taken to ensure the deployment was successful?

- A. Log into the Sametime server and ensure the telephony presence plug-in has been added to the site.xml file.
- B. Log into the Sametime Domino server and ensure the telephony presence plug-in has been added to the TCSP configuration file.
- C. Log into the Avaya ACETM GUI and ensure contact information for the Sametime Connect client has been automatically populated by Avaya ACETM.
- D. Log into the Sametime Connect client and ensure that a telephony presence icon appears for the Sametime Connect client users who are configured for telephony presence information in Avaya ACETM.

Correct Answer: D

QUESTION 5

A technician has installed an Avaya ACETM and Avaya Aura® solution. An Avaya Aura® TR/87 service provider is configured and is in service.

A web application is sending Avaya ACETM a MakeCall request with a calling party of tel:16135558755 and called party of tel:16135558754. The call is not connected as expected even though the correct Avaya Aura® service provider is being selected on Avaya ACETM. What is a likely problem with the Avaya Aura® service provider configuration on Avaya ACETM?

- A. The calling and called party rules are not inserting a \$ after the tel: in the translation rules.
- B. The calling and called party rules are not removing a^ after the tel: in the translation rules.
- C. The calling and called party rules are not inserting a ? after the tel: in the translation rule.
- D. The calling and called party rules are not inserting a + after the tel: in the translation rules.

Correct Answer: B
