QUESTION 1

Which types of voice ports allow a small office to provide outbound DNIS and inbound DID?

A. FXS and FXO

B. FXO and EandM

C. FXS and FXS-DID

D. FXS and EandM

E. FXS-DID and FXO

Correct Answer: E

Explanation: An FXO trunk is one of the simplest analog trunks available. Because Dialed Number Information Service (DNIS) information can only be sent out to the PSTN, no direct inward dialing (DID) is possible. ANI is supported for inbound calls. Two signaling types exist, loopstart and groundstart, with groundstart being the preferred method. An FXS DID trunk can receive only inbound calls, thus a combination of FXS DID, and FXO ports is required for inbound and outbound calls http://www.cisco.com/en/US/docs/voice_ip_comm/cucme/srnd/design/guide/gatewy.html#wp10 52323

QUESTION 2

Which QoS technology provides a strict priority queuing scheme that allows delay-sensitive data such as voice to be dequeued and sent before packets in other queues are dequeued, and also works with WFQ and CBWFQ.

A. header compression

B. IP RTP Priority and Frame Relay IP RTP Priority

C. RSVP

D. low latency queuing

E. FRF.12

Correct Answer: B

QUESTION 3

Which QoS mechanism for VoIP works with weighted fair queuing (WFQ) and class-based weighted fair queuing (CBWFQ)?

A. Header compression

B. FRF.12

C. IP RTP Priority and Frame Relay IP RTP Priority

D. Multilink PPP

E. RSVP

Correct Answer: C

QUESTION 4

Which command should you use when checking for phone registration status or verifying button assignments?

A. show IP phone

B. show ephone-dn 9

C. show ephone

D. show telephony-service

Correct Answer: C

QUESTION 5

Drag the appropriate IOS command from left and drop them in the spaces on the order to configure Cisco Unified Border Element. The ITSP does not support early offer. Not all boxes are used.

Select and Place:

Correct Answer:

Explanation/Reference:

Configuring an IP IP Gateway:

Call direction and translation section

voice service voip - Enters VoIP voice-service configuration mode
