### QUESTION 1

You have configured two SSL VPN certificate-to-connection profile mappings for all users and Sales users. The connection profiles for the Sales users are not being applied when the users connect. Based on the configuration that is shown, what would cause this issue?

- A. The priority of the RASSL4SALES mapping is too high and needs to be lower than the priority of the RASSL4ALL mapping.
- B. The priority of the RASSL4ALL mapping is too low and it needs to be increase but not more than the priority of the RASSL4SALES mapping.
- C. The priority of the RASSL4ALL mapping is not low enough and it needs to be lowered to 1.
- D. The matching criteria for the RASSL4SALES mapping is too specific and should match something more generic.
