QUESTION 1

Modular Policy Framework provides a consistent and flexible way to configure security appliance features in a manner similar to Cisco IOS software QoS CLI. Which three Cisco Modular Policy Framework features are bidirectional? (Choose three.)

A. AIP policy

B. QoS input policing

C. CSC policy

D. QoS priority queue

E. Application inspection

F. QoS output policing

Correct Answer: ACE

QUESTION 2

Study the following exhibit carefully. You are asked to configure the Cisco ASA security appliance with a connection profile and group policy for full network access SSL VPNs. During a test of the configuration using the Cisco AnyConnect VPN Client, the connection times out. In the process of troubleshooting, you determine to make configuration changes. According to the provided Cisco ASDM configuration, which configuration change will you begin with?

A. Require a client certificate on the interface.

B. Enable an SSL VPN client type on the interface.

C. Enable DTLS on the interface.

D. Enable a different access port that doesn\\'t conflict with Cisco ASDM.

Correct Answer: B

QUESTION 3

You are the network administrator of your company. You would like to add SSL VPN Cisco AnyConnect VPN Client for use by remote users. After checking the Cisco software download site, you discovered a number of different versions of Cisco AnyConnect VPN Client Software available for download. If you know the Cisco ASA Adaptive Security Appliance Software version and the remote user\\'s PC operating system, how to determine the appropriate version of Cisco AnyConnect VPN Client to download?

A. The version of CiscoAnyConnect VPN Client Software must only be compatible with the operating system.

B. Newer versions of the CiscoAnyConnect VPN Client Software are backward compatible with earlier versions.

C. The version of CiscoAnyConnect VPN Client Software and the compatible version of Cisco ASA Adaptive Security Appliance Software are based on release notes.

D. All versions of the CiscoAnyConnect VPN Client Software are compatible with all releases of Cisco ASA Adaptive Security Appliance Software.

Correct Answer: C

QUESTION 4

The IT department of your company must perform a custom-built TCP application within the clientless SSL VPN portal configured on your Cisco ASA security appliance. The application should be run by users who have either guest or normal user mode privileges. In order to allow this application to run, how to configure the clientless SSL VPN portal?

A. configure a smart tunnel for the application

B. configure a bookmark for the application

C. configure the plug-in that best fits the application

D. configure port forwarding for the application

Correct Answer: A

QUESTION 5

Which two statements correctly describe the local user database in the security appliance? (Choose two.)

A. You can create user accounts with or without passwords in the local database.

B. You cannot use the local database for network access authentication.

C. You can configure the security appliance to lock a user out after the user meets a configured maximum number of

failed authentication attempts.

D. The default privilege level for a new user is 15.

Correct Answer: AC
