QUESTION 1

Cisco ASA 5505 Adaptive Security Appliance is designed for providing high-performance security services. Study the following exhibit carefully. You are asked to configure a Cisco ASA 5505 Adaptive Security Appliance as an Easy VPN hardware client. When the telecommuter using the ASA 5505 Adaptive Security Appliance for remote access first tries to connect to resources on the corporate network, he is prompted for authentication. Which two group policy features will require authentication, even if a username and password are configured on the Easy VPN hardware client? (Select two.)

A. Individual User Authentication

B. Certificate Authentication

C. Secure Unit Authentication

D. Extended Authentication

E. Remote User Authentication

F. Group Authentication

Correct Answer: AC

QUESTION 2

Refer to the exhibit. You have configured a Layer 7 policy map to match the size of HTTP header fields that are traversing the network. Based on this configuration, will HTTP headers that are greater than 200 bytes be logged?

A. No, because the reset action for headers greater than 100 bytes would be the first match.

B. Yes, because the log action for headers greater than 200 bytes would be the last match.

C. Yes, because the reset action for headers greater than 100 bytes and the log action for headers greater than 200 bytes would both be applied.

D. No, because reset or log actions are a part of the service policy and the Layer 7 policy map.

Correct Answer: A

QUESTION 3

Modular Policy Framework provides a consistent and flexible way to configure security appliance features in a manner similar to Cisco IOS software QoS CLI. Your company asked you to examine the current Cisco Modular Policy Framework configurations on the LA-ASA Cisco Adaptive Security Appliance (ASA) by use of the Cisco Adaptive Security Device Manager (ASDM).

Which step will be taken by the Cisco Adaptive Security Appliance on FTP traffic entering its outside interface?

A. Masks the FTP greeting banner.

B. Translates embedded IP addresses.

C. Blocks the FTP request commands APPE, GET, RNFR, RNTO, DELE, MKD, and RMD.

D. Prevents all users except "root" from accessing the path/root.

Correct Answer: B

QUESTION 4

Refer to the exhibit. You have configured a Layer 7 policy map to match the size of HTTP header fields that are

traversing the network. Based on this configuration, will HTTP headers that are greater than 200 bytes be logged?

```
policy-map type inspect http TEST
  parameters
  match request header length gt 100
    reset
  match request header length gt 200
    log
```

A. No, because the reset action for headers greater than 100 bytes would be the first match.

B. Yes, because the log action for headers greater than 200 bytes would be the last match.

C. Yes, because the reset action for headers greater than 100 bytes and the log action for headers greater than 200 bytes would both be applied.

D. No, because reset or log actions are a part of the service policy and the Layer 7 policy map.

Correct Answer: A

QUESTION 5

Which three statements correctly describe protocol inspection on the Cisco ASA adaptive security appliance? (Choose three.)

A. The protocol inspection feature of the security appliance securely opens and closes negotiated ports and IP addresses for legitimate client-server connections through the security appliance.

B. For the security appliance to inspect packets for signs of malicious application misuse, you must enable advanced (application layer) protocol inspection.

C. If inspection for a protocol is notenabled, traffic for that protocol may be blocked.

D. If you want to enable inspection globally for a protocol that is not inspected by default or if you want to globally disable inspection for a protocol, you can edit the default global policy.

Correct Answer: ACD
