100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Cisco  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

A customer has requested their wireless infrastructure to be able to provide voice phones with the ability to indicate to a wireless controller that the call is urgent and needs to be placed immediately. What solution should be recommended to the customer?

- A. enable load-based CAC for voice networks and configure expedited bandwidth
- B. disable load-based CAC for voice networks to turn off the controllers monitoring of the access point's load, allowing for as many voice calls to be placed as necessary
- C. configure expedited bandwidth and change the 802.1p value to 7 for platinum QoS
- D. reconfigure the SSID for KTS based CAC to allow for a more granular handling of voice traffic

Correct Answer: A

### QUESTION 2

Refer to the exhibit.

Client MAC Addr	AP Name	Expire Time (mm:ss)	Multicast Status	QoS U
58:8d:09:d3:53:4f	Pod1b	00:50	Normal Multicast	

What two items of multicast information can be interpreted from the WLC display? (Choose two.)

- A. WLC-to-AP multicast mode is configured for Unicast.
- B. WLC-to-AP multicast mode is configured for multicast.
- C. IGMP snooping is disabled.
- D. IGMP snooping is enabled.
- E. VideoStream is allowed for the wireless client.
- F. VideoStream is not allowed for the wireless client.

Correct Answer: DE

### QUESTION 3

A wireless customer has called with a problem regarding voice calls. When a person is put on hold, there is silence and the music on hold does not come across. What is a requirement of music on hold?

- A. Multicast routing should be configured at least to the wireless controller and client dynamic interfaces.
- B. There needs to be multicast routing configured network wide from the access point to the wireless controller.
- C. The wireless voice network needs to be configured for a QoS of platinum to permit the multicast traffic.
- D. The music on hold's multicast address needs to be configured for multicast direct.

Correct Answer: A

---

#### QUESTION 4

During the testing and verification phase of an 802.11n deployment, an employee wants to be able to stream video at a much faster rate than the previous 802.11a/b/g deployment. What 802.11n capability can be utilized for this?

- A. Access points and clients are capable of utilizing spatial-multiplexing, multi-ratio combining, and transmit beamforming, which allows for a more efficient wireless spectrum that can utilize higher data- rates.
- B. Clients can make use of MIMO to aggregate the data sent from the access points whether 802.11n or 802.11a to create a higher throughput network.
- C. Clients can utilize ClientLink which allows them to use the signal received from 802.11n access points on its various radio chains to perform multi-ratio combining.
- D. Clients are able to utilize High-Rate Direct Sequence Spread Spectrum (HR-DSSS) to reach higher data-rates, which in turn allow for much faster video streaming.

Correct Answer: A

---

#### QUESTION 5

Using proper VoWLAN design practice, what would be a reasonable total number of calls for a properly designed 802.11a cell to ensure call quality?

- A. 4
- B. 7
- C. 14
- D. 20
- E. 25
- F. 27

Correct Answer: D
