QUESTION 1

Which attribute does the VoWLAN Readiness Tool of WCS v7.0 use to predict acceptable conditions?

A. SNR

B. RSSI

C. PER

D. WMM

E. QBSS

Correct Answer: B

QUESTION 2

A Cisco WLC v7.0 is properly configured for 802.11n and multicasting video without the optional Cisco VideoStream. Which three options best describe the frames that are sent from the AP to the wireless clients? (Choose three.)

A. unicast to subscribed clients

B. multicast to subscribed clients

C. After startup, throughput is consistent.

D. After startup, throughput can vary over time.

E. retransmission upon failure of delivery

F. no retransmission

Correct Answer: BDF

QUESTION 3

Which statement best describes the ideal VoWLAN design?

A. smaller cells with all data rates enabled to ensure that all clients can associate

B. smaller cells with higher data rates enabled and admission control enabled through WMM

C. larger cells with higher data rates enabled and WPA2 to secure voice conversations

D. smaller cells with higher data rates enabled and no overlap to prevent co-channel interference

Correct Answer: B

QUESTION 4

A wireless network needs for QoS to be mapped end-to-end to provide reliability for network applications. What two port configurations and QoS markings should be utilized for the switch to accept the APs tags? (Choose two.)

A. For a local mode AP, the switchport should be configured as an access port trusting the DSCP tag from the AP.

B. The switch should have MLS QoS enabled with all uplink and downlink ports configured to trust CoS tags. All uplink switches need to trust the CoS tags.

C. The switch should have MLS QoS enabled with all uplink and downlink ports configured to trust DSCP tags. All uplink switches need to trust the DSCP tags as well.

D. For a local mode AP, the switchport should be configured as an access port trusting the CoS tag from the AP.

E. For a local mode AP the switchport should be configured as a trunk port trusting both DSCP or CoS tags from the AP.

Correct Answer: AB

QUESTION 5

A WLC v7.0 is configured for multicast with WLC-to-AP multicast mode using IP address 239.10.10.10, IGMP snooping enabled, and all other parameters set to default. Which two statements describe how a wired ingress broadcast and multicast frame are handled? (Choose two.)

A. WLC will forward the broadcast frame to all APs and then to all WLANs.

B. WLC will forward the broadcast frame to all APs and then to only WLANs with active clients.

C. WLC will forward a broadcast frame to only APs and their respective WLANs with active clients.

D. WLC will drop the broadcast frame.

E. WLC will forward the multicast frame to all APs and then to all WLANs.

F. WLC will forward the multicast frame to all APs and then to only WLANs with active clients.

G. WLC will forward a multicast frame to only APs and their respective WLANs with active clients.

H. WLC will drop the multicast frame.

Correct Answer: DF
