QUESTION 1

As an experienced network engineer, you must understand the meaning of network-embedded application intelligence. Could you explain it specifically?

- A. the ability to deploy applications that are hosted logically on physical devices
- B. the ability of application servers to offload tasks and instead process application software
- C. the ability of a virtual machine to reboot from a different VMware ESX if a specific host goes down
- D. the ability to centrally manage all application servers from one management console

Correct Answer: B

QUESTION 2

As a network engineer, you have to interact with various decision makers when presenting a data center solution. Which one of the following pieces of information most likely an IT manager take interest in?

- A. the specifications and feature set of the Cisco Nexus lineup
- B. the strategic partnerships that allow Cisco to deliver an end-to-end solution
- C. the greatly reduced number of points of management that result from consolidating resources
- D. the stability and financial strength of Cisco, and the world-class support after the sale

Correct Answer: C

QUESTION 3

Your customer is considering implementing blade servers for the first time. He is unsure what the consequences will be for his I/O connectivity. Which would be an appropriate response?

- A. Cisco supports blade server I/O only when it leaves the blade server chassis. All blade server I/O is compatible with Cisco's Catalyst and MDS families of switches.
- B. Cisco has solutions for blade server IP switches that fit inside the blade server chassis for many major vendors. Cisco does not have a blade server switch for Fibre Channel because all storage connections for blade servers should use only iSCSI.
- C. Cisco has solutions for blade server IP switches and Fibre Channel switches that fit inside the blade server chassis for many major vendors. Fitting a Cisco switch into a blade server means that compatibility with Cisco's Catalyst and MDS high-level features can be guaranteed.
- D. Cisco blade server switches are external, rack-mountable devices that are designed to complement the form factor of blade server chassis from many major vendors. These include vendor-specific cable management systems for ease of connection from the switch to the blade servers.

Correct Answer: C

QUESTION 4

Which statement describes a feature or function of the Cisco Catalyst 6500 Series FWSM?

- A. It is a standalone appliance and cannot be fitted into the Catalyst 6500 Series Switches.
- B. It fits into the Catalyst 6500 Series Switches and allows logical firewalls to be deployed across the whole data center.
- C. It can deploy multiple virtual firewalls across the data center but only within its own tier, not across tiers.
- D. It is an embedded function of the Cisco Application Control Engine Module, which can be fitted into the Catalyst 6500 Series Switches.

Correct Answer: B

QUESTION 5

Refer to full-width blades, which statement is making sense?

- A. Up to eight full-width blades may fit into a single Cisco UCS 5100 enclosure.
- B. Full-width blades feature four times as many dual-port adapters as half-width blades.
- C. Full-width blades feature a pair of Intel Xenon processors.
- D. Full-width blades feature four times as many DIMM slots as half-width blades.

Correct Answer: D
