QUESTION 1

Which core component of the Cisco Video Surveillance solution is responsible for distribution, archiving, and storage of video feeds?

A. Cisco VSOM

B. Cisco SASD

C. Cisco VSMS

D. Cisco PSOM

Correct Answer: C

QUESTION 2

Which way of upgrading the Cisco VSM 7.x does Cisco recommend?

A. via the management console web interface and .RPM files

B. via the management console web interface and .ZIP file

C. via Linux command line: Stop Cisco Services - Uninstall existing RPM files - Install new RPM files - Restart Cisco Services

D. via an upgraded USB/DVD image

Correct Answer: B

QUESTION 3

You are ready to add a new media server to VSOM, as well as a new set of cameras that will archive video to this new VSMS.

What is the first step you should perform in VSMC?

A. Look in the system log for unknown messages

B. Assign local repositories

C. Check Mediaout to verify you have plenty of space available

D. Define the RTP port range in the firewall

Correct Answer: B

QUESTION 4

After troubleshooting an issue with VSM 6.3.2, you determine that a support case should be opened with Cisco TAC. VSM 6.3.2 includes a tool to generate a support report for this purpose.

Where is the support report generated from for Cisco TAC analysis?

A. VSOM Admin pages > Reports tab

B. VSOM Admin pages > Database Backups tab

C. VSOM Admin pages > Health Dashboard tab

D. VSMC

Correct Answer: D

QUESTION 5

Mr. Cooper, branch security manager at a retail bank, is asked to create a centralized surveillance solution using Cisco VSM. However, the WAN link between HQ and some of the branches has very limited bandwidth. Using Cisco VSM, flexibility of deployment is broad.

Which three changes make more efficient use of the limited bandwidth? (Choose three.)

A. Deploy centralized Cisco VSM solution using H.264 instead of MJPEG encoding in branches with limited WAN speed.

B. Retain camera recordings on local branch servers, and access video from HQ only when needed.

C. Configure cameras for H.264 encoding and 15 FPS, store video locally on a server, then transcode the same video stream to 5 FPS before sending it to HQ security center.

D. Configure dual streaming on each camera, one for high-quality local recording and the other for streaming to HQ over WAN.

E. Enable multicast within the branch network and unicast video streams when traversing the WAN.

Correct Answer: ABD
