QUESTION 1

A SharePoint environment was set up by using an automated installation script. Corporate policies prevent the use of wizards for installing and configuring server environments.

You plan to provide information from an external business system as metadata values within the environment. Users are not permitted to access this business system directly and the data cannot be exported from the external business system into SharePoint.

You need to ensure that users can access the metadata provided by the external system.

Which service should you configure? (To answer, select the appropriate service in the answer area.)

Hot Area:

Machine Translation Service Application

Machine Translation Service Application

Managed Metadata Service Application

Managed Metadata Service Application

Search Administration Web Service for Search Service Application

Search Service Application

Search Service Application

Secure Store Service Application

Secure Store Service Application

Security Token Service Application

State Service

QUESTION 2

You are preparing to upgrade the Partner Projects site collection.

You need to perform the prerequisite task.

Which Windows PowerShell cmdlet should you run?

- A. Invoke-PolicyEvaluation
- B. Request-SPOUpgradeEvaluationSite
- C. Start-OrganizationUpgrade
- D. Upgrade SPOSite

Correct Answer: B

QUESTION 3

You are managing a SharePoint farm,

You need to log Microsoft SQL Server 2012 events that occur in the farm.

In Centra1 Administration, which monitoring setting should you configure? (To answer, select the appropriate setting in the answer area.)

Hot Area:

Monitoring

Health Analyzer
Review problems and solutions, Review rule definitions

Timer Jobs
Review job definitions, Check job status

Reporting
View administrative reports
Configure diagnostic logging
Configure usage and health data collection
View health reports

Correct Answer:

Monitoring

Health Analyzer
Review problems and solutions, Review rule definitions

Timer Jobs
Review job definitions, Check job status

Reporting
View administrative reports
Configure diagnostic logging
Configure usage and health data collection
View health reports

Note:

* SharePoint 2013 writes usage and health data to the logging folder and to the logging database. You can use the SharePoint Central Administration website to

configure health data collection settings.

* See step 3 (and 9 note the reference to SQL authentication). Configure usage and health data collection by using Central Administration The usage and health

data settings are farm-wide and cannot be set for individual servers in the farm.

To configure usage and health data collection by using Central Administration:

1. Verify that you have the following administrative credentials:

The user account that performs this procedure has to be a member of the Farm Administrators group.

2. In Central Administration, on the home page, click Monitoring.

3. On the Monitoring page, in the Reporting section, click Configure usage and health data collection.

4. On the Configure usage and health data collection page, in the Usage Data Collection section, select the Enable usage data collection check box.

5. In the Event Selection section, select the check boxes of the events that you want to log.

6. In the Usage Data Collection Settings section, type the path of the folder to which you want usage and health information to be written in the Log file location

box. The path that you specify must exist on each server in the farm.

These settings are applied to all events.

7. In the Health Data Collection section, select the Enable health data collection check box. To change the collection schedules, click Health Logging Schedule.

8. To change log collection schedules, click Log Collection Schedule, and then click any of the timer jobs to change its schedule, or disable that timer job. If you

disable a timer job, it stops collecting corresponding log data.

9. In the Logging Database Server section, to change the authentication method, select either the Windows authentication or SQL authentication option.

QUESTION 4

DRAG DROP

A company plans to make Office Web Apps available for all users. The company deploys a multi-server, load-balanced Office Web Apps server farm.

You install and configure SSL certificates.

The SharePoint farm operates in both internal and external zones.

You have the following requirements:

Servers must connect to both zones.

The Office Web apps farm must communicate securely with SharePoint Servers.

You need to configure the environment.

How should you complete the relevant Windows PowerShell commands? To answer, drag the appropriate Windows PowerShell segments to the correct location. Each Windows PowerShell segment may be used once, more than once, or not

at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

PowerShell segments

- New-SPWOPIBinding
- Get-SPWOPIZone
- Set-SPWOPIZone
- external-https
- Set-SPWOPIBinding
- internal-http
- internal-https
- external-http

Answer Area

```
Windows PowerShell segment -ServerName "owas.contoso.com"  
Windows PowerShell segment  
Windows PowerShell segment -zone " Windows PowerShell segment "
```

Correct Answer:

PowerShell segments

external-https
Set-SPWOPIBinding
internal-http
internal-https

Answer Area

New-SPWOPIBinding	-ServerName "owas.contoso.com"
Get-SPWOPIZone	
Set-SPWOPIZone	-zone " external-http "

QUESTION 5

A company's Share Point environment contains three web applications. The root site collections of the web applications host the company intranet site, My Sites, and a Document Center.

SharePoint is configured to restrict the default file types, which prevents users from uploading Microsoft Outlook Personal Folder (.pst) files.

The company plans to require employees to maintain copies of their .pst files in their My Site libraries.

You need to ensure that employees can upload .pst files to My Site libraries.

In which location should you remove .pst files from the blocked file types?

- A. The General Security page in the site settings for the site collection
- B. The Blocked File Types page in the site settings for the site collection
- C. The General Security section of the Security page of Central Administration
- D. The File Types area of the Search service application section of Central Administration

Correct Answer: C
