QUESTION 1

You need to ensure that the developers have the necessary permissions to meet the BCS model requirements. What should you do?

- A. Grant Edit permissions to the developers by using the Set Object Permissions option
- B. Grant Execute permissions to the developers by using the Set Object Permissions option
- C. Grant Edit permissions to the developers by using the Set Metadata Store Permissions option
- D. Grant Execute permissions to the developers by using the Set Metadata Store Permissions option

Correct Answer: C

QUESTION 2

You have a SharePoint Server 2013 server farm.

You discover that many site collection administrators deploy a solution named Soil that contains a feature named Feature1. The administrators do not have farm administrator rights.

You discover that Feature1 has a memory leak.

You need to prevent Feature1 from being used in the farm.

Which link should you use? (To answer, select the appropriate link in the answer area.)

Hot Area:

System Settings

Servers
Manage servers in this farm | Manage services on servers

E-Mail and Text Messages (SMS)
Configure outgoing e-mail settings | Configure incoming e-mail settings | Configure mobile account

Farm Management
Configure alternate access mappings | **Manage farm features** | Manage farm solutions | Manage user solutions | Configure privacy options
Configure cross-firewall access zone

Correct Answer:

System Settings

The screenshot shows the 'System Settings' page with three main sections:

- Servers**: Manage servers in this farm, Manage services on servers
- E-Mail and Text Messages (SMS)**: Configure outgoing e-mail settings, Configure incoming e-mail settings, Configure mobile account
- Farm Management**: Configure alternate access mappings, Manage farm features, Manage farm solutions, Manage user solutions, Configure privacy options, Configure cross-firewall access zone

QUESTION 3

You have a SharePoint Server 2013 server farm.

You purchase an app for SharePoint from the Office Store.

You plan to deploy the app to the farm.

You need to recommend which changes must be made to the network infrastructure before you can deploy the app.

What should you recommend?

- A. Add a host header in Internet Information Services (IIS).
- B. Modify the Hosts file on the front-end Web servers.
- C. Modify the Web.config file on the front-end Web servers.
- D. Add an alias (CNAME) record in DNS.

Correct Answer: D

QUESTION 4

An organization has a SharePoint intranet site.

Documents and other files do not currently appear in search results until the day after they are uploaded to the intranet site.

You need to configure the Search service application to ensure that documents appear in search results within one hour of being uploaded to the site.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

	Answer Area
In the intranet site collection, enable the Search Server Web Parts and Templates feature.	
By using Central Administration, access the Search service application management interface.	
Configure crawl rules.	
By using Central Administration, enable the Search Config Template feature.	
Edit the existing Content Source.	
Configure content source crawl schedules.	
Configure crawler impact rules.	

Correct Answer:

	Answer Area
In the intranet site collection, enable the Search Server Web Parts and Templates feature.	By using Central Administration, access the Search service application management interface.
	Edit the existing Content Source.
Configure crawl rules.	Configure content source crawl schedules.
By using Central Administration, enable the Search Config Template feature.	
Configure crawler impact rules.	

QUESTION 5

You provision and configure a new SharePoint farm. The farm has not been backed up.

You need to use Windows PowerShell to back up all service applications in the farm.

How should you build the cmdlet? (To answer, drag the appropriate element to the correct location or locations in the answer area. Each element may be used once, more than once, or not at all. You may need to drag the split bar between

panes or scroll to view content.)

Select and Place:

Answer Area

Backup-
