QUESTION 1

A company has several offices that are located in the office building in Seattle. The company also has employees visiting from other countries. You implement Skype for Business Server Enterprise Voice.

The company has a phone at a security desk. You need to implement call routing for emergency calls. The solution must meet the following requirements:

What technologies should you implement? To answer, drag the appropriate technology to the correct requirement in the answer area. Each technology may be used once, more than once, or not at all. Additionally, you may need to drag the

split bar between panes or scroll to view content.

Select and Place:

Technologies

- a conferencing policy
- a Contact object
- an external user access policy
- a normalization rule
- a voice policy
- an unassigned number

Answer Area

If a user dials 112, the call must be routed to a phone extension of 0911.

If a user dials 0911, the call must be routed to the phone at the security desk.

The phone at the security desk must be used to forward calls to the emergency number in the Seattle office only.

Technology

Technology

Technology

Correct Answer:

Technologies

- a conferencing policy
- a Contact object
- an external user access policy
- a normalization rule
- a voice policy
- an unassigned number

Answer Area

If a user dials 112, the call must be routed to a phone extension of 0911.

If a user dials 0911, the call must be routed to the phone at the security desk.

The phone at the security desk must be used to forward calls to the emergency number in the Seattle office only.

a normalization rule

a normalization rule

a voice policy

QUESTION 2

Contoso recently completed a migration to Exchange Online and would like to enable Unified Messaging integration with their on-premises deployment of Skype for Business Server 2015.

Outlook Web App Instant Messaging integration is already working, and Exchange Online users are able to schedule Skype meetings from Outlook Web App.

You need to identify the first step to be performed on both Exchange Online and Skype for Business Server 2015 to enable Unified Messaging capabilities for all users.

In the table below, identify the action that must be taken in each service.

NOTE: Make only one selection in each column. Each correct answer is worth one point.

Hot Area:

Action	Exchange Online	Skype for Business Server 2015
Configure hosted voice mail policy	<input type="radio"/>	<input type="radio"/>
Enable users for hosted voice mail	<input type="radio"/>	<input type="radio"/>
Configure contact object for hosted Exchange Unified Messaging	<input type="radio"/>	<input type="radio"/>
Configure Exchange Unified Messaging dial plan	<input type="radio"/>	<input type="radio"/>
Configure Exchange Unified Messaging policies	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Action	Exchange Online	Skype for Business Server 2015
Configure hosted voice mail policy	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Enable users for hosted voice mail	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Configure contact object for hosted Exchange Unified Messaging	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Configure Exchange Unified Messaging dial plan	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Configure Exchange Unified Messaging policies	<input checked="" type="checkbox"/>	<input type="checkbox"/>

QUESTION 3

You have a Skype for Business Server 2015 infrastructure and a Microsoft Exchange Server 2013 organization.

You enable Enterprise Voice for all users. You plan to implement Unified Messaging (UM).

You need to configure a dial plan between Exchange Server 2013 and Skype for Business Server 2015.

How should you configure the URI type and the VoIP security in the dial plan? To answer, select the appropriate URI type and the VoIP security in the answer area.

Hot Area:

Answer Area

URI type:

E.164
SIP URI
Telephone extension

VoIP security:

Secured
SIP Secured
Unsecured

Correct Answer:

Answer Area

URI type:

E.164
SIP URI
Telephone extension

VoIP security:

Secured
SIP Secured
Unsecured

QUESTION 4

You need to identify the metric that is causing poor quality in Skype for Business calls by analyzing the user activity report collected by the help desk department. Which metric should you choose?

- A. burst gap duration
- B. round trip
- C. packet loss
- D. jitter

Correct Answer: C

QUESTION 5

You need to configure the unassigned numbers range to support the planned changes.

Which four actions should you perform? To answer, move the four appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Answer Area

Run the **Import-CsAnnouncementFile** Skype for Business Management Shell cmdlet.

Run the **New-CsAnnouncement** Skype for Business Management Shell cmdlet.

Create an .mp3 file that contains the announcement.

Create an unassigned number range.

Run the **Set-CsApplicationServer** Skype for Business Management Shell cmdlet.

Create a .wav file that contains the announcement.

Correct Answer:

Actions

Answer Area

Create an .mp3 file that contains the announcement.

Run the **Set-CsApplicationServer** Skype for Business Management Shell cmdlet.

Create a .wav file that contains the announcement.

Run the **Import-CsAnnouncementFile** Skype for Business Management Shell cmdlet.

Run the **New-CsAnnouncement** Skype for Business Management Shell cmdlet.

Create an unassigned number range.
