QUESTION 1

You need to recommend a solution to resolve the privacy issue that users report. What should you recommend?

- A. a conferencing policy
- B. a client version policy
- C. a client policy
- D. a presence policy

Correct Answer: C

QUESTION 2

You deploy Skype for Business 2015 for pilot users in your company.

You deploy a Front End pool and two Edge Servers.

You configure the following DNS entries: lyncdiscoverinternal.companyA.com points to the internal IP address of the Edge Server
lyncdiscover.companyA.com points to the external IP address of the Edge Server
sipinternal.companyA.com points to the internal web services IP address of the Front End pool
sip.companyA.com points to the external web services IP address of the Front End pool

You discover that users cannot connect their Skype for Business clients. You need to quickly fix the issue.

Which record should you change first?

- A. sipinternal.companyA.com
- B. lyncdiscover.companyA.com
- C. lyncdiscoverinternal.companyA.com
- D. sip.companyA.com

Correct Answer: C

Explanation:

You should change the lyncdiscoverinternal.companyA.com record first. This record is used first by the Skype for Business clients during autodiscovery. It needs to point to the internal web services.

You should not change the lyncdiscover.companyA.com record first. This is the second record checked and it should point to the external web services.

You should not change the sipinternal.companyA.com record first. This is the third record checked and it should point to the Front End pool.

You should not change the sip.compnYA.com record first. This is the fourth record in the list that will be checked and it

should point to the Front End pool for internal clients.

QUESTION 3

You support Skype for Business Server 2015 servers in your customer's company network.

You enable federation with Skype for consumers.

Users of Skype for consumers are unable to participate in instant messaging (IM) conversations in your customer's organization. You need to ensure that the users of Skype for consumers clients are able to participate in IM conversations.

Which two actions should you perform? Each correct answer presents part of the solution.

- A. Create a SIP federated provider.
- B. Enable an archiving disclaimer to federated partners.
- C. Enable partner domain discovery.
- D. Create an external access policy.

Correct Answer: D

QUESTION 4

You need to configure federation for the Sydney office.

What should you do? To answer, select the appropriate action from each list in the answer area.

Hot Area:

Answer Area

Create the following DNS SRV record:

▼
_sipfederationtls._tcp.adatum.com
_sipfederationtls._tcp.wideworldimporters.com
_sip._tls.adatum.com
_sip._tls.wideworldimporters.com

Configure the topology - step one:

▼
Define the Edge pool.
Define the federation route.

Configure the topology - step two:

▼
Define the Edge pool.
Define the federation route.

Correct Answer:

Answer Area

Create the following DNS SRV record:

▼
_sipfederationtls._tcp.adatum.com
_sipfederationtls._tcp.wideworldimporters.com
_sip._tls.adatum.com
_sip._tls.wideworldimporters.com

Configure the topology - step one:

▼
Define the Edge pool.
Define the federation route.

Configure the topology - step two:

▼
Define the Edge pool.
Define the federation route.
