*

From Scenario:

A client computer named Monitor01 must be used to monitor client connectivity by using synthetic transactions.

*

You must run Watchernode.msi on a computer where both the Operations Manager (SCOM) agent files and the Lync Server 2013 core components are installed. Note:

*

Watcher nodes are computers that periodically run Lync Server synthetic transactions.

Synthetic transactions are Windows PowerShell cmdlets that verify that key end user scenarios—such as the ability to sign in to the system, or the ability to exchange instant messages—are working as expected.
