QUESTION 1

You need to implement the Sales Progress website. Which service application should you create and configure?

- A. a Business Data Connectivity Service application
- B. an Application Management Service application
- C. the Access Service 2010 service application
- D. the PerformancePoint Service application

Correct Answer: D

QUESTION 2

You need to ensure that sales department users can create site collections. You run the following Windows PowerShell commands: `$w = Get-SPWebApplication http://customer.contoso.com`

```
$w.SelfServiceSiteCreationEnabled = $True
```

```
$w.Update()
```

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: A

QUESTION 3

You manage a SharePoint Server. The operating system, Search index files, and blob cache are located on separate drives.

You observe the following issues:

file lock out errors

delays in indexing of content

overall poor SharePoint Search performance

occasional virus and malware warning

You determine that antivirus scans are causing the issues.

You need to resolve the issues.

How should you configure antivirus scanning? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

QUESTION 4

A company

Correct Answer:

Actions

- Configure a retention policy for the Contracts document library.
- Create a Disposition workflow for the Contracts document library.
- Manage item scheduling for the Contracts document library.

Answer Area

Step

Action

- 1 Create a purchasing department site collection based on the Publishing Portal template.
- 2 Configure the In Place Records Management feature for the purchasing site collection.
- 3 Configure Records Declaration settings on the purchasing department site collection.
- 4 Configure Record Declaration settings for the Contracts document library.

QUESTION 5

You are customizing standard content types for an organization. For the tracking of a department, you must allow users to easily select or enter a value.

In some cases, users may refer to a single department by more than one name. Users must be able to select or type any name for a department but the document must be associated with only one department.

You need to create a column that supports the requirements. What should you create?

- A. a Choice site column that uses a drop-down menu.
- B. a Choice site column that uses check boxes
- C. a Choice list that uses a drop-down menu
- D. a Managed Metadata site column

Correct Answer: D

As per the requirement, users should be able to refer a single department with multiple names which can be achieved by synonyms of Managed Metadata Terms.
