**QUESTION 1**

A company uses SharePoint Online and SharePoint Server 2016 on-premises.

You need to configure two-way federated search between SharePoint Online and SharePoint Server on-premises.

How should you configure federated search? To answer, drag the appropriate option to the correct result source and remote providers. Each option may be used once, more than once, or not at all. You may need to drag the split bar between

panes or scroll to view content.

Note: Each correct selection is worth one point.

Select and Place:

**QUESTION 2**

You are preparing to migrate content from your SharePoint Server 2016 farm to a new location. All content is hosted within a single web application across 150 site collections.

You have the following requirements:

Users must be able to view existing content during the migration, but must not make changes.

You must minimize the amount of time that the migration takes.

You must return all access rights to their previous state once the migration is complete.

You need to configure the SharePoint site collections.

What should you configure?

- A. an information management policy
- B. privacy options
- C. Read only access for content
- D. alternate access mappings
- E. a user policy

Correct Answer: C

---

### QUESTION 3

You are a SharePoint Administrator for Contoso, Ltd. You manage a large SharePoint Server farm. You configure a single SharePoint Search application for the farm. The Search Service application has five crawl databases. All crawl databases have content.

Contoso would like to crawl content from a partner company named WingTip Toys. This crawled content must be stored in a dedicated crawl database.

You need to configure the environment.

What should you do?

- A. Create a dedicated Microsoft SQL Server instance for the WingTip Toys crawl database.
- B. Add a crawl database to the existing Search Service application.
- C. Provision a new Search Service application. Configure the Search Service application to crawl WingTip Toys content.
- D. Provision a new Search Server for the existing Search Service application. Add dedicated crawl components for WingTip Toys to the new Search Server.

Correct Answer: B

---

Maximum crawl databases per Search Service application increased from 5 to 15 in SharePoint 2016.

---

#### QUESTION 4

You need to monitor the environment.

You run the following Windows PowerShell cmdlet:

```
Set-SPDiagnosticConfig
```

Does this solution meet the goal?

A. Yes

B. No

Correct Answer: B

---

#### QUESTION 5

You are a SharePoint administrator for Contoso Ltd. You manage an environment that includes an on-premises SharePoint Server and ShapePoint Online.

Data stored on-premises must not be indexed online. In addition, this data must not be available outside of the corporate network.

You need to configure federated search.

Which two actions should you perform. Each correct answer presents part of the solution.

A. In SharePoint Online, create a results source.

B. In SharePoint Server, create a query rule to turn on hybrid search results.

C. In SharePoint Online, create a query rule to turn on hybrid search results.

D. In SharePoint Server, create a result source.

Correct Answer: CD
