QUESTION 1

You work for a financial services company that has an Exchange Server 2013 organization.

Mailbox audit logging is enabled for all mailboxes.

The company identifies the following requirements for the sales department:

The manager of the sales department must be able to search for email messages that contain specific key words in the mailboxes of the users in the sales department.

The manager of the human resources department must receive a report that contains a list of all the sales users' mailboxes that were searched by the sales manager.

You need to identify which tasks must be performed to meet the requirements.

Which tasks should you identify?

To answer, drag the appropriate task to the correct requirement in the answer area. Each task may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view content.

Select and Place:

Correct Answer:

Tasks	Answer Area
Export the security events.	The manager of the sales department must be able to search for email messages that contain specific key words in the mailboxes of the users in the sales department.
Export the administrator audit log.	The manager of the human resources department must receive a report that contains a list of all the sales users' mailboxes that were searched by the sales manager.

QUESTION 2

You have an Exchange Server 2013 organization that has two sites. The sites use a single namespace.

Each site contains two Exchange servers and a hardware load balancer. Mailboxes are distributed evenly between the sites.

Your company's IT policy states that all users must be able to access their mailbox if one site fails.

You implement a DNS round robin solution for the Client Access server infrastructure.

When a site outage occurs, some users report experiencing intermittent slowness when they connect to their mailbox.

You need to recommend a solution to resolve the issue.

What are two possible recommendations to achieve this goal? Each correct answer presents a complete solution.

- A. Remove the Virtual IP (VIP) of the failed data center.
- B. Implement geo-dns
- C. Add one additional Client Access server to each site.
- D. Deploy a Windows Failover Cluster in each site.
- E. Lower the TTL of the DNS records.

Correct Answer: AE

QUESTION 3

You need to implement a solution that meets the compliance requirements for the members of the legal department. Which two cmdlets should you use? (Each correct answer presents part of the solution. Choose two.)

- A. New-RoleAssignmentPolicy
- B. Add-ManagementRoleEntry
- C. New-ManagementRoleAssignment
- D. New-ManagementRole
- E. New-ManagementScope

Correct Answer: CD

* From scenario:

/ Only the users in the legal department must be able to use eDiscovery to view the contents of email messages sent by the finance department users.

/ Users in the legal department use a shared mailbox named Legal. Legal is enabled for In-Place Hold. Legal is the only mailbox on DB2.

We need to assign the role to the legal department users using the New-ManagementRoleAssignment cmdlet.

To restrict the eDiscovery access to the finance users emails, we need to create a scope using the New-ManagementScope cmdlet.

QUESTION 4

DRAG DROP

You need to recommend a solution to meet the compliance requirements for the research department and the statutory holidays.

What should you recommend configuring?

To answer, drag the appropriate object to the correct location in the answer area. Each object may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view content.

Select and Place:

Objects	Answer Area
a MailTip	Research department compliance requirement
a PolicyTip	Object
a transport rule	Object
a retention tag	Statutory holidays compliance requirement
an email address policy	Object

Correct Answer:

Objects	Answer Area
a MailTip	Research department compliance requirement
a PolicyTip	Statutory holidays compliance requirement
a transport rule	
a retention tag	
an email address policy	

QUESTION 5

Your company has two offices. The offices are located in New York and Tokyo.

You have an Exchange Server 2013 organization.

You have the following Unified Messaging (UM) dial plans:

Tokyo Dial Plan

New York Dial Plan

A user named User 1 has a mailbox that is associated with the New York Dial Plan. User 1 frequently works from both the New York and the Tokyo offices.

You need to add an extension from the Tokyo office to the account of User1.

Which cmdlet should you run?

- A.
Set-Mailbox
- B.
Set-UMMailbox
- C.
Set-UMMailboxPolicy
- D.
Set-UMDialPlan

Correct Answer: D

Use the Set-UMDialplan cmdlet to set various properties on a Unified Messaging (UM) dial plan.

The Extension parameter specifies the extension number used by the Call Someone feature when a call is transferred.
