QUESTION 1

You have an Active Directory forest named contoso.com that contains an Exchange Server 2016 organization named Contoso.

Contoso.com has a two-way forest trust with an Active Directory forest named fabrika.com.

The fabriakm.com forest contains an Exchange Server 2016 organization named Fabrikam.

You need to ensure that the users in Contoso can access the free/busy information of all the users in Fabrikam.

An administrator from Fabrikam runs the following command in the organization.

Get-MailboxServer | Add-ADPermission -Accessrights Extendedright -Extendedrights "ms- ExchEPI-Token-Serialization" -User "CONTOSO\Exchange Servers"

What command should you run in Contoso? To answer, select the appropriate options in the answer area.

Hot Area:

Answer Area

| Add-AvailabilityAddressSpace |
| Set-AvailabilityConfig |

-AccessMethod OrgWideFB

| -ForestName Contoso.com |
| -ForestName Fabrikam.com |

| -UseServiceAccount $false |
| -UseServiceAccount $true |

Correct Answer:

Answer Area

| Add-AvailabilityAddressSpace |
| Set-AvailabilityConfig |

-AccessMethod OrgWideFB

| -ForestName Contoso.com |
| -ForestName Fabrikam.com |

| -UseServiceAccount $false |
| -UseServiceAccount $true |

QUESTION 2

Your company has an Exchange Server 2016 organization.

All users have a primary mailbox and archive mailboxes.

You create a new retention policy for the users. The policy includes the following types of tags:

A default retention policy tag (RPT) applied to the mailbox: The tag is configured to move email messages older than three years to the archive.

An RPT applied to the users\\' Sent Items folder: The tag is configured to move email messages older than one year to the archive.

The corporate retention policy is applied to all of the mailboxes.

A user creates a personal tag named Tag1. The personal tag is configured to delete items permanently after 180 days.

The user sends an email message that uses Tag1. You need to identify what will occur to the message. What should you identify?

A. The message will be deleted in six months.

B. The message will he moved to the archive in one year.

C. The message will be moved to the archive in one year and deleted six months later.

D. The message will be moved to the archive in three years.

Correct Answer: A

Personal tags allow your users to determine how long an item should be retained. For example, the mailbox can have a DPT to delete items in seven years, but a user can create an exception for items such as newsletters and automated notifications by applying a personal tag to delete them in three days.

QUESTION 3

HOTSPOT

You need to configure a data loss prevention (DLP) policy to meet the compliance and security requirements.

How should you configure the policy rule? To answer, select the appropriate options in the answer area.

Hot Area:

Apply this rule if...

> The recipient is outside of the organization.
> The message properties include this classification.

And...

> The recipient is outside of the organization.
> The message contains sensitive information.

Do the following...

> Add the sender's manager as a recipient.
> Generate an incident report and send the report to (email address).
> Block the message: Reject the message and include an explanation.

And...

> Redirect the message to (email address).
> Notify the sender by using a policy tip and block the message.
> Block the message: Reject the message and include an explanation.

Correct Answer:

Apply this rule if...

> The recipient is outside of the organization.
> The message properties include this classification.

And...

> The recipient is outside of the organization.
> The message contains sensitive information.

Do the following...

> Add the sender's manager as a recipient.
> Generate an incident report and send the report to (email address).
> Block the message: Reject the message and include an explanation.

And...

> Redirect the message to (email address).
> Notify the sender by using a policy tip and block the message.
> Block the message: Reject the message and include an explanation.

QUESTION 4

You plan to configure the Exchange organization for site failovers.

You need to recommend how many certificates must be deployed to meet the availability requirements and the security requirements.

What is the minimum number of certificates you should recommend deploying?

A. one

B. two

C. three

D. four

Correct Answer: A

QUESTION 5

You need to recommend changes to the existing environment to meet the high-availability requirements for the mailbox databases. What should you recommend?

A. Run the Update-MailboxDatabaseCopy cmdlet.

B. Deploy a file share witness in Azure.

C. Run the Set-MailboxServer cmdlet.

D. Deploy a file share witness to a branch office.

Correct Answer: B
