QUESTION 1

You use a centralized identity management system as a source of authority for user account information. You export a list of new user accounts to a file on a daily basis. Your company uses a local Active Directory for storing user accounts for

on-premises solutions.

You are also using Azure AD Connect.

New user accounts must be created in both the local Active Directory and Office 365. You must import user account data into Office 365 daily.

You need to import the new users.

What should you do?

- A. Create a Windows PowerShell script to import account data from the file into Active Directory.
- B. Create a Windows PowerShell script that uses the MSOnline module to import account data from the file.
- C. Use the Azure Management Portal to import the file.
- D. Use the Office 365 admin center to import the file.

Correct Answer: A

To force a full sync with the Azure AD Connect tool from Windows PowerShell run `Import-Module ADSync` followed by `Start-ADSyncSyncCycle -PolicyType Initial`

Note: The DirSync tool, which you can use to synchronize your on-premises Active Directory Domain Services (AD DS) with an instance of Azure Active Directory (AD), has been updated with the new Azure AD Connect tool. You typically use the DirSync or Azure AD Connect tools to configure either password synchronization or single sign-on so that your users can use their on-premises AD DS credentials to authenticate to Office 365. The new Azure AD Connect tool provides a richer feature set than the DirSync tool and is now the recommended tool to use.

QUESTION 2

You are the Office 365 administrator for your company.

Users report that they have received significantly more spam messages over the past month than they normally receive.

You need to analyze trends for the email messages received over the past 60 days.

From the Office 365 admin center, what should you view?

- A. the Mail protection reports
- B. the Office 365 Malware detections in received mail report
- C. messages on the Message center page

D. the Mailbox access by non-owners report

Correct Answer: A

Use mail protection reports in Office 365 to view data about malware, spam, and rule detections.

If you're an Exchange Online or Exchange Online Protection (EOP) admin, there's a good chance you'd like to monitor how much spam and malware is being detected, or how often your transport rules are being matched. With the interactive mail protection reports in the Office 365 admin center, you can quickly get a visual report of summary data, and drill- down into details about individual messages, for as far back as 90 days.

QUESTION 3

Fabrikam, inc is a financial services organization.

Fabrikam recently purchased another financial services organization named Contoso, Ltd.

Fabrikam has 2000 users. Contoso has 500 users.

Windows 10 and office 2016 are deployed to all computers.

Physical Location:

Fabrikam has an office in the United States. Contoso has an office in the United Kingdom.

The offices connect to each other by using a WAN link. Each office also connects directly to the internet.

Existing Environment:Active Directory:

The network Fabrikam contains an Active Directory forest.

The Active Directory environment of Contoso was migrated to the Active Directory forest of Fabrikam. The forest contains three domains named fabrikam.com,contractor.fabrikam.com, and contoso.com.

All domain controllers run Windows Server 2008 R2.

All contractors outsourced by fabrikam use the user principal name (UPN) suffix of contractor.fabrikam.com. If fabrikam hires the contractor as a permanent employee, the UPN suffix changes to fabrikam.com.

Network

The network has the following configurations:

- * External IP address for the United States office: 192.168.1.100
- * External IP address for the United Kingdom office: 192.168.2.100
- * Internal IP address range for the United States office: 10.0.1.0/24
- * Internal IP address range for the United Kingdom office : 10.0.2.0/24

Active Directory Federation Services (ADFS)

AD FS and web Application Proxies are deployed to support an app for the sales department. The app is accessed from the Microsoft Azure Portal.

Office 365 Tenant

You have an Office 365 subscription that has the following configurations:

- * Organization name: Fabrikam Financial Services.
- * Vanity domain: Fabrikamfinancialservices.onmicrosoft.com
- * Microsoft SharePoint domain: Fabrikamfinancialservices.sharepoint.com
- * Additional domain added to the subscription: Contoso.com and fabrikam.com

Requirements:Planned Changes:

- * Deploy Azure AD connect.
- * Move mailboxes from Microsoft Exchange 2016 to Exchange Online.
- * Deploy Azure multi-factor authentication for devices that connect from untrusted networks only.
- * Customize the AD FS sign-in webpage to include the Fabrikam logo, a helpdesk phone number, and a sign-in description.
- * Once all of the Fabrikam users are replicated to Azure Active Directory (Azure AD), assign an E3 license to all of the users in the United States office.

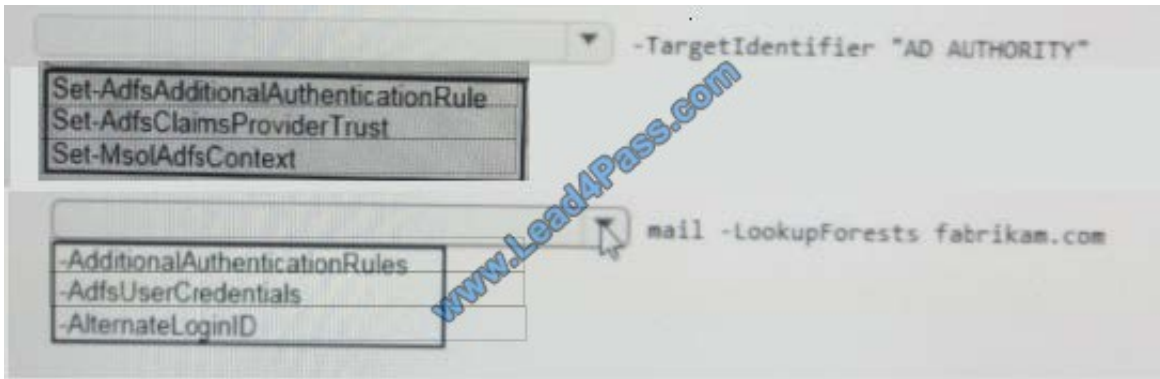

Technical Requirements:

Contoso identifies the following technical requirements:

- * When a device connects from an untrusted network to <https://outlook.office.com>, ensure that users must type a verification code generated from a mobile app.
- * Ensure that all users can access office 365 services from a web browser by using either a UPN or their primary SMTP email address.
- * After Azure AD connect is deployed, change the UPN suffix if all the users in the Contoso sales department to fabrikam.com.
- * Ensure that administrator are notified when the health information of Exchange Online changes.
- * User Office 365 reports to review previous tasks performed in Office 365.

You need to configure the AD FS servers to meet the technical requirement for accessing Office 365 from a web browser. What command should you run? To answer, select the appropriate options in the answer area.

Hot Area:

Correct Answer:

QUESTION 4

You are the Office 365 administrator for your company. Your company uses Office 365 for collaboration.

You must reset the password for all of the employees in your company.

You need to ensure that all employees create a new password the next time they sign in to Office 365.

How should you complete the relevant Windows PowerShell command? To answer, drag the appropriate Windows PowerShell segment to the correct location or locations. Each Windows PowerShell segment may be used once, more than

once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

Answer Area

```
Get-MsolUser -All |
```

Set

Correct Answer:

Answer Area

```
Get-MsolUser -All |
```

Set

-MsolUserPassword **-ForceChangePassword \$true**

QUESTION 5

You are the office 365 administrator for a company. You deploy Microsoft SharePoint Online.

Many users report that they cannot discover useful content via searches.

You need to run the appropriate SharePoint Online report to help identify the issue.

Which report should you run?

- A. SharePoint Site Usage
- B. SharePoint Activity
- C. Query Rule Usage by Day
- D. Abandoned Queues by Day

Correct Answer: D
