QUESTION 1

You are the Exchange Online administrator for an organization. The organization migrates all users to Exchange Online. An employee works for a partner organization named Contoso, Ltd. The employee uses the email alias

employee1@contoso.com.

Users report that over the past week, they have not received email messages from employee1@contoso.com.

You need to trace email messages that originate from employee1@contoso.com to users inside your organization.

In the message trace window, which two settings should you configure? To answer, select the appropriate objects in the answer area.

Hot Area:

*Time zone:
(UTC-08:00) Pacific Time (US & Canada) ▼

*Start date and time:
Tue 7/22/2014 ▼ 3:30 PM ▼

*End date and time:
Tue 7/22/2014 ▼ 3:30 PM ▼

Delivery status:
All ▼

Message ID:
[Empty text box]

Specify messages from or to a person or group. Use full email addresses or wildcards in the format: *@contoso.com. When specifying a wildcard, other addresses can't be used.

Sender:
[Empty text box] [add sender...]

Recipient:
[Empty text box] [add recipient...]

Correct Answer:

*Time zone:
[UTC-08:00] Pacific Time (US & Canada)

*Start date and time:
Tue 7/22/2014 3:30 PM

*End date and time:
Tue 7/22/2014 3:30 PM

Delivery status:
All

Message ID:
[Empty field]

Specify messages from or to a person or group. Use full email addresses or wildcards in the format: *@contoso.com. When specifying a wildcard, other addresses can't be used.

Sender:
[Empty field] [add sender...]

Recipient:
[Empty field] [add recipient...]

As we want to trace the emails originated from employeeel@contoso.com we must specify him as the sender.

We also know that email messages from this user has not been received for the last 7 days. We should therefore change the start date and put it back 7 days.

QUESTION 2

You are the system architect for a large global manufacturing company. Your company has headquarters in the United States and branch offices in Belgium, Japan and Mexico.

You are piloting Office 365 for your organization and use the United States as your billing address location for the Office 365 tenant.

You need to determine which Office 365 settings can be changed after you create the office 365 tenant.

Which three settings can you change?

NOTE: Each correct selection is worth one point.

- A. site URL used by Office 365 groups
- B. global administrator

- C. technical contact
- D. organization name
- E. tenant region

Correct Answer: BCD

QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You deploy Office 365 for all company users. You use Microsoft Exchange Online for company email. You must develop a process to assign licenses to new users in your company.

You need to implement the licensing process.

Solution: Use the Office 365 admin center.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: A

QUESTION 4

You are the Office 365 administrator for a company. All employees have Active Directory Domain Services (AD DS) user accounts. All users accounts are part of an organizational unit (OU) and are members of a security group.

You deploy Azure Active Directory (Azure AD) Connect by using the Express Settings.

You plan to provision user accounts to Office 365. Only employee user accounts should be synchronized to Office 365.

You need to enable filtering for Azure AD Connect.

Which two types of filtering can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Domain-based
- B. OU-based

- C. Group-based
- D. Attribute-based

Correct Answer: BD

All four types of filtering can be used. However, domain-based and group-based filtering can only be configured on installation.

QUESTION 5

You are the Office 365 administrator.

You need to enable monitoring of Office 365 by using System Center Operations Manager (SCOM).

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- From the SCOM console, import the management pack.
- Install the Microsoft System Center Management Pack for Office 365 on the SCOM server
- Download the SCOM Management Pack for Operations Management Suite Service Map integration.
- Download the Microsoft System Center Management Pack for Office 365.
- From the SCOM console, add the Office 365 subscription.
- Install the SCOM Pack for Operations Management Suite Service Map integration on the SCOM server.
- From the SCOM console, configure the workspace.

Answer Area

Five empty rectangular boxes arranged vertically, intended for the user to place and order the selected actions.

Correct Answer:

Actions

| |
|---------------------------------------------------------------------------------------------------|
| |
| |
| Download the SCOM Management Pack for Operations Management Suite Service Map integration. |
| |
| |
| |
| Install the SCOM Pack for Operations Management Suite Service Map integration on the SCOM server. |
| |

Answer Area

| |
|----------------------------------------------------------------------------------------|
| Download the Microsoft System Center Management Pack for Office 365. |
| Install the Microsoft System Center Management Pack for Office 365 on the SCOM server. |
| From the SCOM console, add the Office 365 subscription. |
| From the SCOM console, configure the workspace. |
| From the SCOM console, import the management pack. |
