**QUESTION 1**

You need to configure the Office application deployment options.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

## Answer Area

Requirement	Setting
Update frequency	<div style="border: 1px solid black; padding: 2px;"><div style="background-color: #cccccc; height: 20px; display: flex; justify-content: flex-end; align-items: center; padding-right: 5px;">▼</div><div style="padding: 2px;"><p>Current Channel</p><p>Deferred Channel</p><p>Insider Preview</p></div></div>
Office version to enable	<div style="border: 1px solid black; padding: 2px;"><div style="background-color: #cccccc; height: 20px; display: flex; justify-content: flex-end; align-items: center; padding-right: 5px;">▼</div><div style="padding: 2px;"><p>Office 2016 for Mac</p><p>Office 2016 for Windows</p><p>Skype for Business</p></div></div>

Correct Answer:

## Answer Area

### Requirement

Update frequency

### Setting

	▼
Current Channel	
Deferred Channel	
Insider Preview	

Office version to enable

	▼
Office 2016 for Mac	
Office 2016 for Windows	
Skype for Business	

### QUESTION 2

You plan to implement a collaboration platform for a company. All 1,000 employees currently use Excel 2010.

You have the following requirements:

All employees must be able to co-author Excel workbooks.

You must minimize the costs associated with any solution.

You need to recommend a solution.

Which solution should you recommend?

- A. Implement SharePoint 2013 with Excel Services.
- B. Implement SharePoint 2013 and continue using Excel 2010.
- C. Implement SharePoint Online and upgrade clients to Excel 2013.
- D. Implement SharePoint 2013 with an Office Web Apps server.

Correct Answer: A

Excel services consists of three components: Excel Calculation Services, Excel Web Access, and Excel Web Services. Excel Web Access allows for co-authoring of Excel workbooks.

### QUESTION 3

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You manage an Office 365 tenant.

You need to ensure that user presence information is available to everyone in the organization.

Which Windows PowerShell cmdlet should you run?

- A. Enable-JournalRule
- B. New-RetentionPolicyTag
- C. Start-ManagedFolderAssistant
- D. Set-CsUser
- E. Set-CsPrivacyConfiguration
- F. Set-HostedContentFilterPolicy
- G. Set-MalwareFilterPolicy
- H. Set-MailboxJunkEmailConfiguration

Correct Answer: E

The Set-CsPrivacyConfiguration cmdlet allows you to change a current set of privacy configuration settings, which help determine how much information users make available to other users.

### QUESTION 4

You are the Office 365 administrator for your company. The company has a single Active Directory Domain Services domain. As part of the Office 365 deployment, the company is preparing to deploy Office Telemetry.

You need to disguise file names and document titles, while still collecting the telemetry data.

What should you do?

- A. In the Telemetry Dashboard, disable data collection for the Telemetry Agent.
- B. In the Telemetry Dashboard, obfuscate the document name, title, and path.
- C. In the Telemetry Dashboard, display only files that are used by multiple users.
- D. In the Default Domain policy, set the Turn on data uploading for the Telemetry agent Group Policy setting to Disabled.

Correct Answer: B

The enablefileobfuscation policy setting configures the Telemetry Agent to disguise the file name, file path, and title of Office documents before uploading telemetric data to the shared folder.

In Manage privacy settings in Telemetry Dashboard, you can learn about Telemetry Dashboard settings that help you protect user privacy by disguising file names and titles or by preventing data for selected applications or solutions from being reported.

Figure: Three ways to configure privacy settings in Telemetry Dashboard

### QUESTION 5

Your company uses Microsoft Exchange Online. Employees frequently need to change their primary email addresses.

The messaging operations team has requested a script to simplify the process of changing email addresses.

The script must perform the following actions:

Obtain employee information from a .csv file that has a header line of UserPrincipalName,CurrentPrimaryAddress,NewPrimaryAddress. Change employees\' primary email addresses to the values in the NewPrimaryAddress column.

Retain employees\' current email addresses as secondary addresses. You create the following Windows PowerShell script to read the .csv file. Line numbers are included for reference only.

```
01 param ([string]$filename = $(throw "-filename is required."))
02 import-csv $filename | foreach-object {
03     $UserPrincipalName = $_.UserPrincipalName
04     $OldPrimary = $_.CurrentPrimaryAddress
05     $NewPrimary = $_.NewPrimaryAddress
06
07 }
```

You need to complete the script to meet the requirements.

Which Windows PowerShell command should you insert at line 06?

- A. Set-Mailbox -Identity \$UserPrincipalName -EmailAddresses @{add="SMTP:" + "\$NewPrimary"; remove="SMTP:" + "\$OldPrimary"}
- B. Set-Mailbox -Identity \$UserPrincipalName -EmailAddresses @{add="SMTP:" + "\$NewPrimary", "smtp:" + "\$OldPrimary"; remove="SMTP:" + "\$OldPrimary"}
- C. Set-Mailbox -Identity \$UserPrincipalName -EmailAddresses @{add="SMTP:" + "\$NewPrimary"}
- D. Set-Mailbox -Identity \$UserPrincipalName -PrimarySmtpAddress \$NewPrimary

Correct Answer: C

Explanation: We add the new e-mail address. We retain the old email address by not removing it.

Incorrect:

Not A: We should keep the old address.

Not B: We should keep the old address.

Not D: This just change the PrimarySmtpAddress. We need to retain the old address.

Note: You can add a new email address to multiple mailboxes at one time by using the Shell and a comma separated values (CSV) file. This example imports data from C:\Users\Administrator\Desktop\AddEmailAddress.csv, which has the

following format.

Mailbox,NewEmailAddress

Dan Jump,danj@northamerica.contoso.com David Pelton,davidp@northamerica.contoso.com Kim Akers,kima@northamerica.contoso.com Janet Schorr,janets@northamerica.contoso.com Jeffrey Zeng,jeffreyz@northamerica.contoso.com Spencer Low,spencerl@northamerica.contoso.com Toni Poe,tonip@northamerica.contoso.com

Run the following command to use the data in the CSV file to add the email address to each mailbox specified in the CSV file.

```
Import-CSV "C:\Users\Administrator\Desktop\AddEmailAddress.csv" | ForEach {Set- Mailbox $_.Mailbox -EmailAddresses @{a
```

Reference: Add or remove email addresses for a mailbox
