QUESTION 1

All employees at a company have Exchange Online mailboxes. You have a policy that allows users to send email messages to a maximum of 500 specific recipients per message.

You need to grant User1 the ability to send email messages to 700 specific recipients per message.

What should you do?

A. Add the recipients to a new distribution list. Instruct User1 to send email messages to the list.

B. Run the following Windows PowerShell cmdlet: Set-TransportConfig

C. Run the following Windows PowerShell cmdlet and apply the policy to User1: New-ThrottlingPolicy

D. In the Exchange Admin Center, modify the mailbox properties for User1.

Correct Answer: A

For distribution groups stored in an organization\\'s address book, the group is counted as one recipient.

QUESTION 2

You are the Office 365 administrator for your company.

The company wants to increase the retention age for deleted email items to 90 days.

You need to modify the retention age.

How should you complete the relevant Windows PowerShell script? To answer, drag the appropriate command segments to the correct locations. Each segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scrollto view content.

Select and Place:

Correct Answer:

Retention Policy Tags are used to apply retention settings to folders and individual items such as e-mail messages. These settings specify how long a message remains in a mailbox and the action to be taken when the message reaches the

specified retention age.

The Set-RetentionPolicyTag is used to modify the settings of a retention policy tag. In this question, we use the AgeLimitForRetention parameter to set the retention period to 90 days.

QUESTION 3

Your company has a hybrid deployment of Office 365 that uses single sign-on. The company uses the contoso.com SMTP domain. You have a server named ADFS_Server5 that has the Active Directory Federation Services (AD FS) 2.0 server role installed. A power failure occurs at the data center. Power is restored at the data center. You need to verify that AD FS functions on ADFS_Server5.

What should you do?

A. Run the Test-MapiConnectivity cmdlet.

B. Connect to https://ADFS_Server5.tailspintoys.com/adfs/ls/default.aspx

C. Connect to https://ADFS_Server5.contoso.com/adfs/fs/federationserverservice.asmx.

D. Run the Test-Connectivity cmdlet.

Correct Answer: C

To verify that a federation server is operational

QUESTION 4

You administer the Office 365 tenant for an organization. You assign Enterprise E5 licenses to 500 remote sales team members. Not all sales team members have Office 365 accounts.

You create Microsoft StaffHub teams and send users a link to join the appropnate Staff Hub team. You set the value for

the StaffHub Self Provision Accounts property to On.

You need to determine which users have joined StaffHub for any team.

What should you view?

A. the email sent when each user joins StaffHub

B. the membership of the DeskJess Workers security group

C. the membership of the default Office 365 Team group

D. the membership the default A1I Users security group

Correct Answer: B

QUESTION 5

Your company uses Microsoft SharePoint Online for collaboration. A document library is configured as shown in the following table.

Configuration Option	Current Selection
Require content approval for submitted items?	Yes
Create a version each time you edit a file in this document library?	Create major versions
Who should see draft items in this document library?	Only users who can edit items
Require documents to be checked out before they can be edited?	Yes

www.Lead4Pass.com

You need to enable the coauthoring of documents in the library. What should you do?

A. Change the Who should see draft items in this document library? setting to Any user who can read items.

B. Change the Create a version each time you edit a file in this document library? setting to No Versioning.

C. Change the Require documents to be checked out before they can be edited? setting to No.

D. Change the Require content approval for submitted items? setting to No.

Correct Answer: C

The question states that coauthoring of documents in the library is required. Coauthoring means the ability of multiple people to be able to edit a document simultaneously.

One way to control document collaboration is to require check-out of files, especially when multiple users have access to the library. If you have a file checked out, you can be sure that other people cannot overwrite it. However, you are also

preventing other people from seeing the latest changes or making changes themselves.

Do not configure your library to require checkout if people plan to co-author documents in the library. People cannot work simultaneously on documents when required check-out is turned on.
