QUESTION 1

You need to provide access to the Corporate Projects site collection to remote internal users.

Which authentication mode and site collection URL should you use? (To answer, drag the appropriate answer choices to the correct location or locations in the answer area. Each answer choice may be used once, more than once, or not at all. You may need to drag the

split bar between panes or scroll to view content.)

Select and Place:

The screenshot shows a question interface. On the left, there is a list of five options: Classic-mode authentication, DirectAccess authentication, Forms-based authentication, Host-named site collection, and Path-based site collection. On the right, there is an 'Answer Area' containing a table with two columns: 'Authentication mode' and 'Site collection URL'. The table is currently empty.

Correct Answer:

The screenshot shows the same question interface as above, but with the correct answer placed in the table. The 'Authentication mode' column contains 'DirectAccess authentication' and the 'Site collection URL' column contains 'Path-based site collection'.

QUESTION 2

You are the farm administrator for a single-server SharePoint 2010 Foundation environment.

The company plans to upgrade to SharePoint 2013 Foundation.

You need to ensure that the existing server meets the minimum requirements.

Which three requirements must you meet? (Each correct answer presents part of the solution. Choose three.)

- A. 64-bit edition of Windows Server 2008 SP2
- B. 64-bit processor
- C. 8 GB of RAM
- D. 80 GB of free disk space for the system drive
- E. 64-bit edition of SQL Server 2008

Correct Answer: BCD

Explanation: Installation Scenario

Single server with a built-in database or single server that uses SQL Server Development or evaluation installation of SharePoint Server 2013 or SharePoint Foundation 2013 with the minimum recommended services for development environments.

Requirement:

B: 64-bit, 4 cores Processor

C: 8 GB RAM

D: 80 GB for system drive

Incorrect:

Not A: Minimum requirements for a single server with built-in database:

The 64-bit edition of Windows Server 2008 R2 Service Pack 1 (SP1) Standard, Enterprise, or Datacenter or the 64-bit edition of Windows Server 2012 Standard or Datacenter

Note: no need of a SQL server (can use the builtinSharepoint database server)

Reference: Hardware and software requirements for SharePoint 2013

QUESTION 3

An organization has a SharePoint intranet site.

Documents and other files do not currently appear in search results until the day after they are uploaded to the intranet site.

You need to configure the Search service application to ensure that documents appear in search results within one hour of being uploaded to the site.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

	Answer Area
In the intranet site collection, enable the Search Server Web Parts and Templates feature.	
By using Central Administration, access the Search service application management interface.	
Configure crawl rules.	
By using Central Administration, enable the Search Config Template feature.	
Edit the existing Content Source.	
Configure content source crawl schedules.	
Configure crawler impact rules.	

Correct Answer:

	Answer Area
In the intranet site collection, enable the Search Server Web Parts and Templates feature.	By using Central Administration, access the Search service application management interface.
	Edit the existing Content Source.
Configure crawl rules.	Configure content source crawl schedules.
By using Central Administration, enable the Search Config Template feature.	
Configure crawler impact rules.	

QUESTION 4

You are a SharePoint developer at Contoso, Ltd. The Contoso finance department is developing a reporting application

that displays financial information from an internal application on the SharePoint

Business Intelligence (BI) site.

You must configure a single server SharePoint environment to support Reporting Services.

You must validate that the installation works correctly.

You need to build and test the environment.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- Add the Report Builder report content type to a document library. Select **New** and select **Report Build Report** and publish the report.
- Install and configure a Reporting Services report server in SharePoint mode.
- Register the Reporting Services SharePoint service and the Reporting Services SharePoint proxy. Start the Reporting Services SharePoint service.
- Install and configure a Reporting Services report server in native mode.
- Create the Reporting Services service application.
- Create a Business Intelligence site.

Answer Area

Correct Answer:

Actions

Install and configure a Reporting Services report server in native mode.

Answer Area

Install and configure a Reporting Services report server in SharePoint mode.
Register the Reporting Services SharePoint service and the Reporting Services SharePoint proxy. Start the Reporting Services SharePoint service.
Create the Reporting Services service application.
Create a Business Intelligence site.
Add the Report Builder report content type to a document library. Select New and select Report Build Report and publish the report.

QUESTION 5

You are managing a SharePoint farm that contains the following four sites:

Site1 and Site2 are in the root site collection and contain publicly accessible content.

Site3 is a subsite of Site1, and contains confidential content.

Site4 is a subsite of Site2, and contains confidential content.

All SharePoint sites within the farm must use the principle of least privilege.

You need to plan the site authorization settings.

What should you do? (To answer, drag the appropriate terms to the correct site or sites in the answer area. Each term may be used once, more than once, or not at all. You may need to drag the split

bar between panes or scroll to view content.)

Select and Place:

Answer Area

Site	Permissions
Site1	
Site2	
Site3	
Site4	

Contribute
Design
Full Control
Full Read
Inherited
Unique

Correct Answer:

Answer Area

Site	Permissions
Site1	Inherited
Site2	Inherited
Site3	Unique
Site4	Unique
