QUESTION 1

A company has an Active Directory Domain Services (AD DS) domain and a SharePoint environment. The SharePoint environment includes a team site for each department.

All domain users have Read permissions on the root site. Currently only Human Resources department members have access to the Human Resources team site.

You have the following requirements for the Human Resources site: Employees who are not members of the Human Resources department can view only content that is not marked as sensitive. Human Resources department members can view all content.

You need to configure permissions for the Human Resources site.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Answer Area

- Assign the Limited Access permission level on the sensitive content to all users who are not members of the Human Resources department.
- Configure the sensitive content in the Human Resources site to break inheritance from the parent site.
- Assign the Limited Access permission level on the Human Resources site to users who are not members of the Human Resources department.
- Configure the Human Resources site to inherit permissions from the root site.
- Remove the Read permission level on the sensitive content from users who are not members of the Human Resources department.
