Following Questions and Answers are all new published by Microsoft Official Exam Center

QUESTION 1

You have a DNS server named Server1 that runs Windows Server 2012 R2. On Server1, you create a DNS zone named contoso.com.

You need to specify the email address of the person responsible for the zone.

Which type of DNS record should you configure?

A. Start of authority (SOA)

B. Host information (HINFO)

C. Mailbox (MB)

D. Mail exchanger (MX)

Correct Answer: A

A SOA-record defines the responsible person for an entire zone, but a zone may contain many individual hosts / domain names for which different people are responsible. The RP- record type makes it possible to identify the responsible person for individual host names contained within the zone.

QUESTION 2

You have a server named Server1 that runs Windows Server 2012 R2. Server1 has the File Server Resource Manager role service installed.

Server1 has a folder named Folder1 that is used by the human resources department.

You need to ensure that an email notification is sent immediately to the human resources manager when a user copies an audio file or a video file to Folder1.

What should you configure on Server1?

A. a storage report task

B. a file screen exception

C. a file screen

D. a file group

Correct Answer: C

Create file screens to control the types of files that users can save, and generate notifications when users attempt to save unauthorized files. With File Server Resource Manager (FSRM) you can create file screens that prevent users from

saving unauthorized files on volumes or folders.

File Screen Enforcement:

You can create file screens to prevent users from saving unauthorized files on volumes or folders. There are two types of file screen enforcement: active and passive enforcement. Active file screen enforcement does not allow the user to

save an unauthorized file. Passive file screen enforcement allows the user to save the file, but notifies the user that the file is not an authorized file. You can configure notifications, such as events logged to the event log or e-mails sent to

users and administrators, as part of active and passive file screen enforcement.

QUESTION 3

Your network contains a RADIUS server named Admin1.

You install a new server named Server2 that runs Windows Server 2012 R2 and has Network Policy Server (NPS) installed.
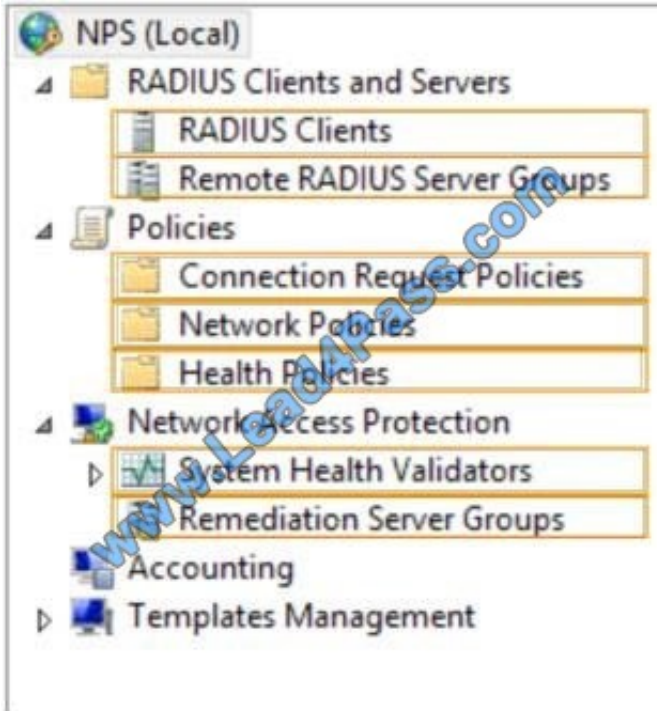

You need to ensure that all accounting requests for Server2 are forwarded to Admin1.

On Server2, you create a new remote RADIUS server group named Group1 that contains Admin1.
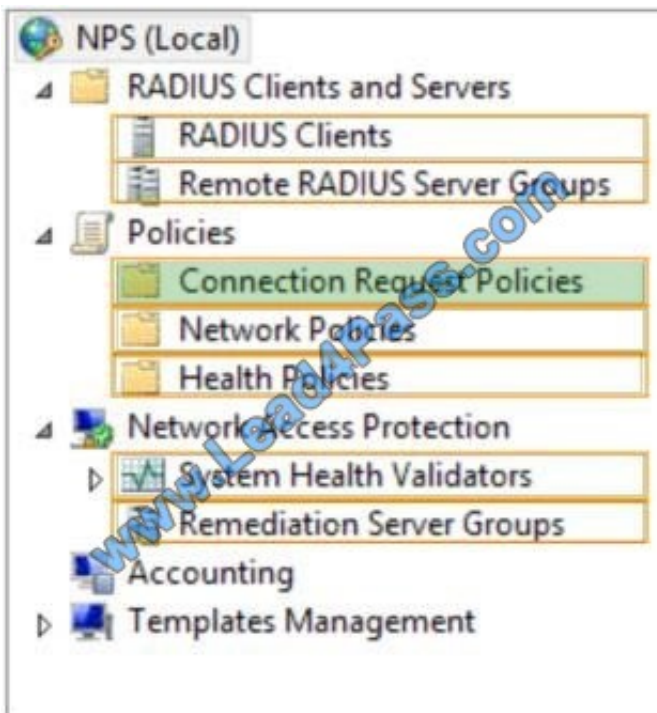

What should you configure next on Server2?

To answer, select the appropriate node in the answer area.

Hot Area:

Correct Answer:

QUESTION 4

Your network contains two servers named Server1 and Server2. Both servers run Windows Server 2012 R2.

On Server1, you create a Data Collector Set (DCS) named Data1.

You need to export Data1 to Server2.

What should you do first?

A. Right-click Data1 and click Data Manager.

B. Right-click Data1 and click Export list.

C. Right-click Data1 and click Properties.

D. Right-click Data1 and click Save template.

Correct Answer: D

QUESTION 5

You have three Windows Server Update Services (WSUS) servers named Server01, Server02, Server03. Server01 synchronizes from Microsoft Update.

You need to ensure that only Server02 and Server03 can synchronize from Server01.

What should you do on Server01?

A. Modify %ProgramFiles%\Update Services\ WebServices\serversyncwebservice\Web.config.

B. From the Update Services console, modify the Automatic Approvals options.

C. Modify %ProgramFiles%\Update Services\ WebServices\serversyncwebservice\SimpleAuth.asmx.

D. From the Update Services console, modify the Update Source and Proxy Server options.

Correct Answer: D
