QUESTION 1

Your company plans to deploy a Microsoft Application Visualization (App-V) 5.0 infrastructure. You need to recommend a strategy to ensure that you can manage the App-V 5.0 infrastructure if a single management server fails. What should you include in the recommendation? More than one answer choice may achieve the goal. Select the BEST answer.

A. Failover Clustering

B. Database mirroring

C. Network Load Balancing (NLB)

D. DNS round robin

Correct Answer: C

QUESTION 2

You have a server named Server1 that runs Windows Server 2012. Server1 has the Remote Desktop Session Host role service installed.

You need to deploy an application named App1 to Server1. The deployment must ensure that hundreds of Remote Desktop Services (RDS) clients can access App1.

Which three actions should you perform? To answer, move the three appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Install App1 on Server1.	
Run change.exe user /execute.	
Run change.exe user /query.	
Run change.exe user /install.	
Run change.exe logon /disable.	
Run change.exe logon /enable.	

Correct Answer:

Box 1: Run change.exe user /install

To install an end-user application on an RD Session Host server, the RD Session Host server must first be switched into a special install mode called RD-Install to ensure that the application will be able to run in a multi-user environment.

Box 2: Install App1 on Server.

Box 3: Run change.exe user /execute

After your applications have been installed on your RD Session Host server, you must switch the server back into execution mode (RD-Execute) before users can remotely connect to your server. You can switch between the install and

execute modes from the command line using these commands:

change user /install

change user /execute

QUESTION 3

Your network contains an Active Directory domain named contoso.com.

You deploy Remote Desktop Services (RDS) to four servers. The servers are configured as shown in the following table.

Server name	Role service
Server1	Remote Desktop Session Host
Server2	Remote Desktop Session Host
Server3	Remote Desktop Connection Broker
Server4	Remote Desktop Web Access

You create a session collection named Collection1 that contains Server1 and Server2. Collection1 will use user profile disks stored in a share named Share1.

Two users named User1 and User2 are members of a group named Group2. User1 and User2 will use RDS.
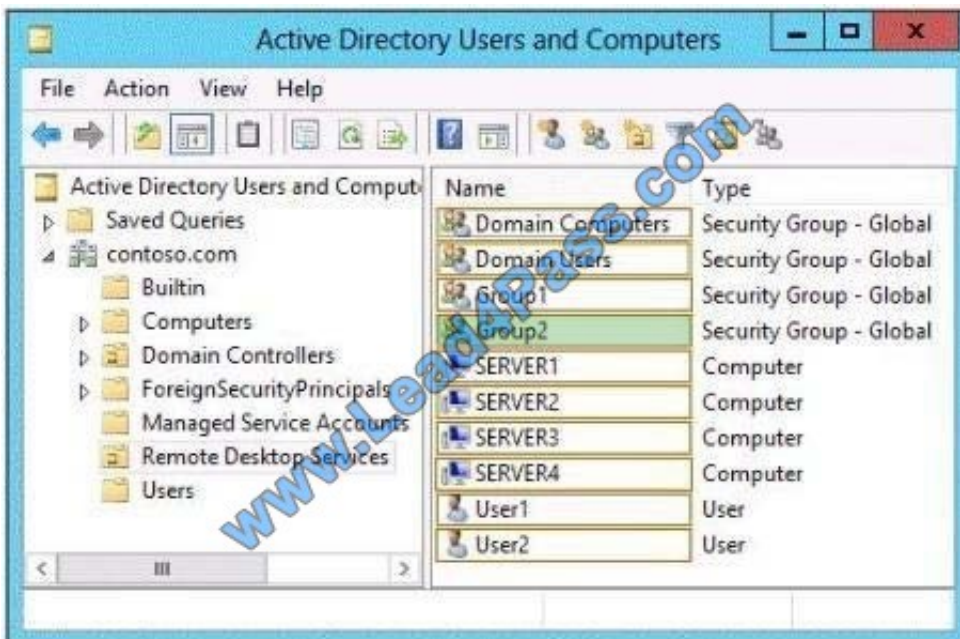

You need to identify which security principal must have full permissions to Share1.

Which security principal should you identify? To answer, select the appropriate object in the answer area.

Hot Area:

Correct Answer:

QUESTION 4

You plan to deploy virtual desktops to the network. All of the virtual desktops will be based on a virtual machine template named Templatel.vhd. Templatel.vhd contains an application named Appl.

You plan to deploy an update to App1 named Applupdate.msp.

You need to recommend the appropriate deployment method to apply Applupdate.msp to Templatel.vhd. You want to achieve this goal by using the minimum amount of administrative effort.

Which deployment method should you recommend?

A. Run dism.exe and specify the /mount-w\rr\ parameter and the /add-package parameter.

B. Start a virtual machine that uses Templatel.vhd. Install Applupdate.msp, and then generalize the virtual machine,

C. Mount Templatel.vhd, and then copy Applupdate.msp to the %Systemroot%\AppPatch folder.

D. Run diskpart.exe and specify the attach parameter. Run msiexec.exe and specify the /update parameter.

Correct Answer: B

QUESTION 5

You need to ensure that the members of Adatum\ResearchManagers have priority to the system resources on the RD Session Host servers. The solution must meet the technical requirements.

A. On the RD Session Host servers, configure the Fair Share CPU Scheduling settings.

B. On the RD Connection Broker servers, configure the collection properties.

C. On the RD Session Host servers, install and configure the Windows System Resource Manager feature.

D. On the RD Session Host servers, install and configure the Windows Process Activation Service feature.

Correct Answer: C
