QUESTION 1

You plan to install a SQL Server 2008 instance for a new application on an existing server that contains a default SQL Server 2005 instance. You need to ensure that both database instances are available for their applications. Your solution

must meet the following requirements:

Minimize administrative effort.

Prevent changes to the existing application environments.

What should you do?

A. Configure both instances to use SQL Server 2008.

B. Configure both applications to use SQL Server 2008.

C. Configure the new application to use a SQL Server 2008 named instance.

D. Configure the new application to use the SQL Server 2008 default instance.

Correct Answer: C

QUESTION 2

You manage several SQL Server 2008 instances. You plan to collect performance data periodically on all instances by using the data collector. All collected data must be stored in the same database hosted on a single instance. You need to collect and load performance data in the management data warehouse every 6 hours. Which data collection process should you implement?

A. Create a cached data collection.

B. Create a scheduled non-cached data collection.

C. Create an on-demand non-cached data collection.

D. Create two different SQL Agent jobs that are scheduled at the same time. One job creates a data collection and the other job uploads the data collection.

Correct Answer: B

QUESTION 3

You configure a SQL Server 2008 instance that contains a database named Customers. The Customers database experiences deadlock problems. You need to capture the deadlock information to the SQL Server error log. What should you do?

A. Enable file system auditing.

B. Enable the Windows Event Collector service.

C. Configure trace flags and then restart the SQL Server instance.

D. Configure a Data Collector Set and then restart the SQL Server instance.

Correct Answer: C

QUESTION 4

You administer a SQL Server 2008 instance. You use the SQL Server Import and Export Wizard to export data from SQL Server to a Microsoft Excel file. You save the package definition to a file. You need to reexecute the package from the command line. Which utility should you use?

A. bcp.exe

B. dta.exe

C. dtexec.exe

D. sqlmaint.exe

Correct Answer: C

QUESTION 5

You administer several SQL Server 2008 instances.

You need to ensure that all SQL Server instances are consistently configured for the following aspects:

Naming conventions

Security settings

Force index creation

Avoidance of data fragmentation

What should you do?

A. Use the Database Engine Tuning Advisor.

B. Use the SQL Server Configuration Manager.

C. Create a policy in Microsoft SQL Server Management Studio.

D. Create a maintenance plan in Microsoft SQL Server Management Studio.

Correct Answer: C
