**QUESTION 1**

You are designing a table that will store transactions for an online retailer. You anticipate that the online retailer will have an average of 500,000 transactions per day. You need to design a solution for data aging and archiving. The solution must minimize the amount of time it takes to return query results for active data.

What should you implement?

A. a linked server

B. a table schema

C. Service Broker

D. table partitioning

Correct Answer: D

**QUESTION 2**

You need to design a database solution that meets the following capabilities: Which SQL Server component should you use?

A. Notification Services

B. Service Broker

C. SQL Mail

D. SQL Server Agent

Correct Answer: D

**QUESTION 3**

You have a stored procedure that is used to set up maintenance tasks. The stored procedure executes every night.

The stored procedure contains three critical data manipulation language (DML) statements that operate against a single table.

You need to prevent users from modifying any data in the table while the stored procedure executes.

Which locking hint should you use?

A. NOLOCK

B. READCOMMITTED

C. REPEATABLEREAD

D. TABLOCKX

Correct Answer: D

---

**QUESTION 4**

You have a server that runs SQL Server 2008 Standard. The server provides data storage for a third- party contact management application.

A service-level agreement for the application does not allow for modifications to be made to the application or to the database objects used by the application. You need to recommend a strategy to mitigate performance issues. The strategy

must minimize database growth.

What should you recommend?

A. a scalable shared database

B. clustered indexes

C. plan guides

D. partitioned tables

Correct Answer: C

---

**QUESTION 5**

You are a database developer. You plan to create a database by using SQL Server 2008. The database will store information about students, teachers, classes, and rooms in a school. The database will be used by a scheduling application.

In the design plan, the following facts have to be considered:

You identify the following entities for the database design:

You need to design the database to ensure normalization.What should you do?

A. 1. Add a new entity named TeachersStudents.2. Establish a relationship between the Teachers and Students entities by using the TeachersStudents entity.

B. 1. Add a new entity named ClassesRooms. 2. Establish a relationship between the Classes and Rooms entities by using the ClassesRooms entity.

C. 1. Add a new entity named TeachersRooms. 2. Establish a relationship between the Teachers and Rooms entities by using the TeachersRooms entity

D. 1. Create a new entity named StudentsRooms. 2. Establish a relationship between the Students and Rooms entities by using the StudentsRooms entity.

Correct Answer: B
