QUESTION 1

You are developing a SQL Server Integration Services (SSIS) package. The package contains several tasks that must repeat until an expression evaluates to FALSE. You need to add and configure a container to enable this design. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place: Select and Place:

Configure the **EvalExpression** property.

Configure the **Enumerator** property.

Open the Data Flow designer of the package.

Add and edit a For Loop container.

Add and edit a Foreach Loop container.

Open the Control Flow designer of the package.

Correct Answer:

Open the Control Flow designer of the package.

Add and edit a For Loop container.

Configure the **EvalExpression** property.

Box 1: Open the Control Flow designer of the package.

Box 2: Add and edit a For Loop container.

Box 3: Configure the EvalExpression property.

QUESTION 2

You are developing a SQL Server Integration Services (SSIS) package that loads data into a data warehouse hosted on Windows Azure SQL Database.

You must combine two data sources together by using the ProductID column to provide complete details for each record. The data retrieved from each data source is sorted in ascending order by the ProductID column.

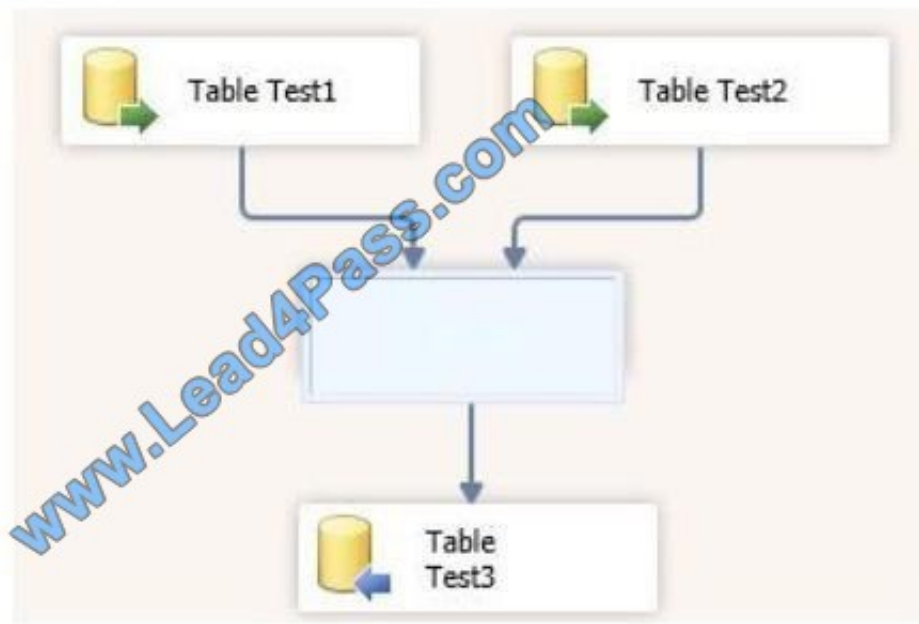

You need to develop a data flow that imports the data while meeting the requirements.

How should you develop the data flow? (To answer, drag the appropriate transformation from the list of transformations to the correct location in the answer area.)

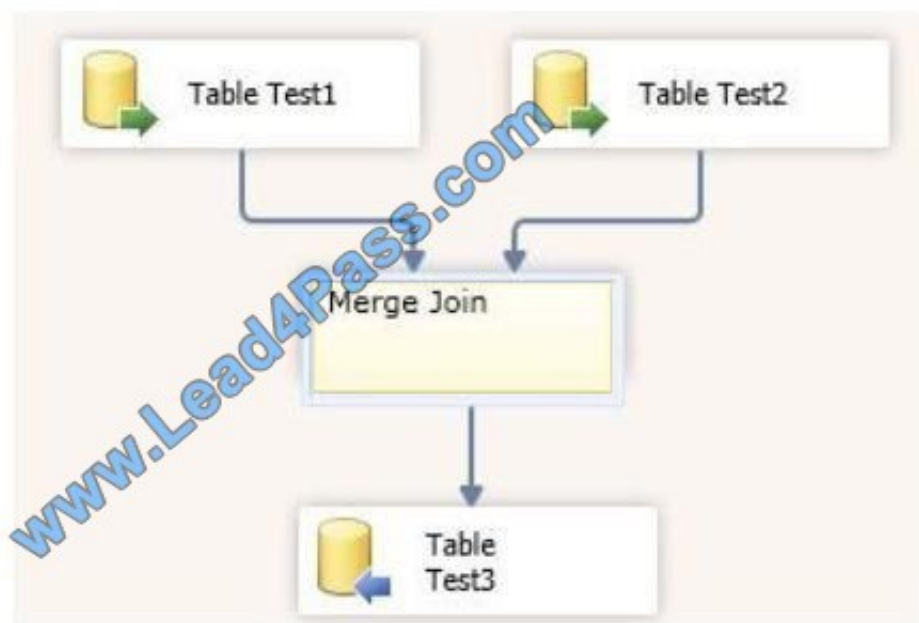

Select and Place:

- Merge
- Merge Join
- Sort
- Union All

Correct Answer:

- Merge
-
- Sort
- Union All

QUESTION 3

You administer a SQL Server 2012 database instance.

You need to configure the SQL Server Database Engine service on a failover cluster.

- A. a domain user
- B. the SQLBrowser account
- C. the BUILTIN\SYSTEM account
- D. a local user with Run as Service permissions

Correct Answer: A

QUESTION 4

You administer a Microsoft SQL Server 2012 database instance.

You plan to migrate the database to Windows Azure SQL Database. You verify that all objects contained in the database are compatible with Windows Azure SQL Database.

You need to ensure that database users and required server logins are migrated to Windows Azure SQL Database.

- A. Back up the database from the local server and restore it to Windows Azure SQL Database.
- B. Use the Copy Database wizard.
- C. Use the Database Transfer wizard.
- D. Use SQL Server Management Studio to deploy the database to Windows Azure SQL Database.

Correct Answer: D

QUESTION 5

Note: This question is part of a series of questions that use the same set of answer choices. An answer choice may be correct for more than one question in the series.

You administer a Microsoft SQL Server 2012 server that hosts a transactional database and a reporting database. The transactional database is updated through a web application and is operational throughout the day. The reporting database is only updated from the transactional database.

Database	Description
Transactional database	<p>Recovery model:</p> <ul style="list-style-type: none">• Full <p>Backup schedule:</p> <ul style="list-style-type: none">• Full database backup: midnight, daily• Differential database backup: on the hour, every two hours starting at 02:00 hours except at 00:00 hours• Log backup: every half hour, except at the times of full and differential backups
Reporting database	<p>Recovery model:</p> <ul style="list-style-type: none">• Simple <p>Backup schedule:</p> <ul style="list-style-type: none">• Full database backup: 01:00 hours daily• Differential database backup: 13:00 hours daily <p>Data updates:</p> <ul style="list-style-type: none">• Changes in data are updated from the transactional database to the reporting database at 00:30 hours and at 12:30 hours• The update takes 15 minutes

The differential backup of the reporting database fails. Then, the reporting database fails at 14:00 hours.

You need to ensure that the reporting database is restored. You also need to ensure that data loss is minimal.

What should you do?

- A. Perform a page restore.
- B. Perform a partial restore.
- C. Perform a point-in-time restore.
- D. Restore the latest full backup.
- E. Restore the latest full backup. Then, restore the latest differential backup.
- F. Restore the latest full backup, and restore the latest differential backup. Then, restore the latest log backup.
- G. Restore the latest full backup, and restore the latest differential backup. Then, restore each log backup taken before the time of failure from the most recent differential backup.
- H. Restore the latest full backup. Then, restore each differential backup taken before the time of failure from the most recent full backup.

Correct Answer: D
