**QUESTION 1**

A production SQL Server Analysis Services (SSAS) cube is processed daily. The users query products by using a hierarchy named Products from a dimension named Product.

The DimProduct table in the data source view is used as the source of the Product dimension. The table has the following structure.

```
CREATE TABLE [dbo].[DimProduct](
  [DimensionKey] [int] IDENTITY(1,1) NOT NULL,
  [ProductKey] [int] NOT NULL,
  [ProductName] [varchar](50) NOT NULL,
  [SubCategoryKey] [int] NOT NULL,
  [SubCategoryName] [varchar](50) NOT NULL,
  [CategoryKey] [int] NOT NULL,
  [CategoryName] [varchar](50) NOT NULL
) ON [PRIMARY]
```

The Product dimension has three attribute hierarchies:

Product

Subcategory

Category

The attributes have the following relationships defined: Product > Subcategory - Category. Each attribute has a key and a name sourced from the related key and name columns in theDimProduct table. During processing, you receive the

following error message: "Errors in the OLAP storage engine: A duplicate attribute key has been found when processing: Table: \\'dbo_DimProducf, Column:

\\'SubCategoryKey\\', Value: \\'23\\'. The attribute is Subcategory\\'." You verify that the data is accurate.

You need to ensure that the dimension processes successfully.

What should you do?

A. Remove the duplicate data from the DimProduct table.

B. Delete the Products hierarchy.

C. Remove the Subcategory attribute.

D. Relate the Subcategory and Category attributes directly to the Product attribute.

Correct Answer: D

**QUESTION 2**

You need to perform the pre-upgrade database backup operation by using SQL Server Management Studio (SSMS). How should you configure the backup options?

A. Select the Apply compression check box. Select the Encrypt backup file check box and supply a password.

B. Clear the Apply compression check box. Select the Encrypt backup file check box and supply a password.

C. Clear the Apply compression check box. Clear the Encrypt backup file check box.

D. Select the Apply compression check box. Clear the Encrypt backup file check box.

Correct Answer: A

**QUESTION 3**

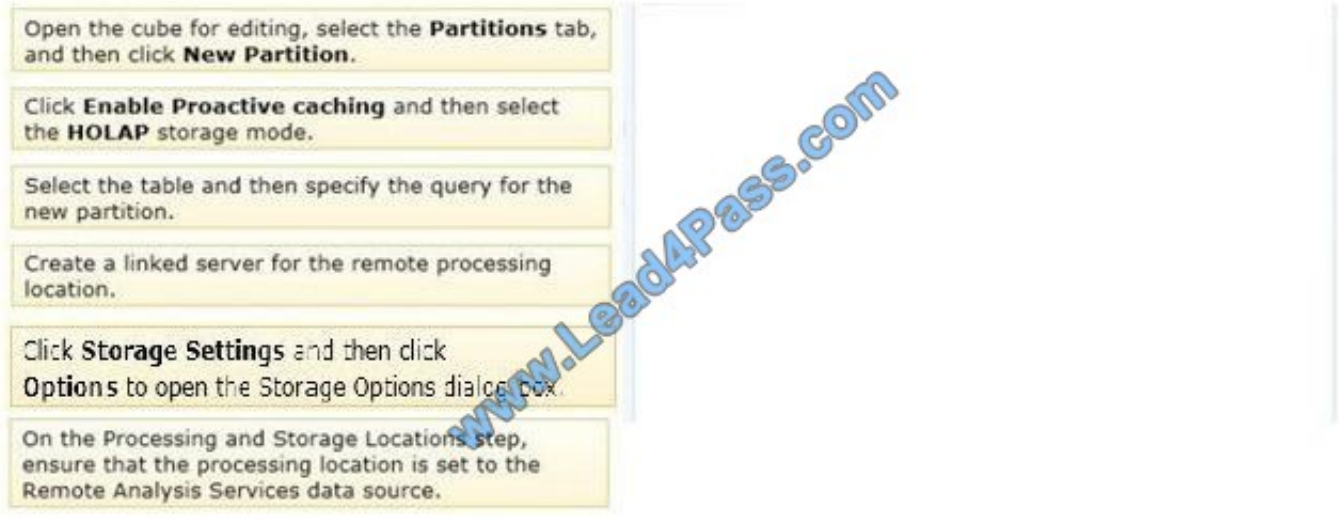
You are developing a SQL Server Analysis Services (SAS) multidimensional project that is configured to source data from a SQL Azure database.

You plan to use multiple servers to process different partitions simultaneously. You create and configure a new data source.

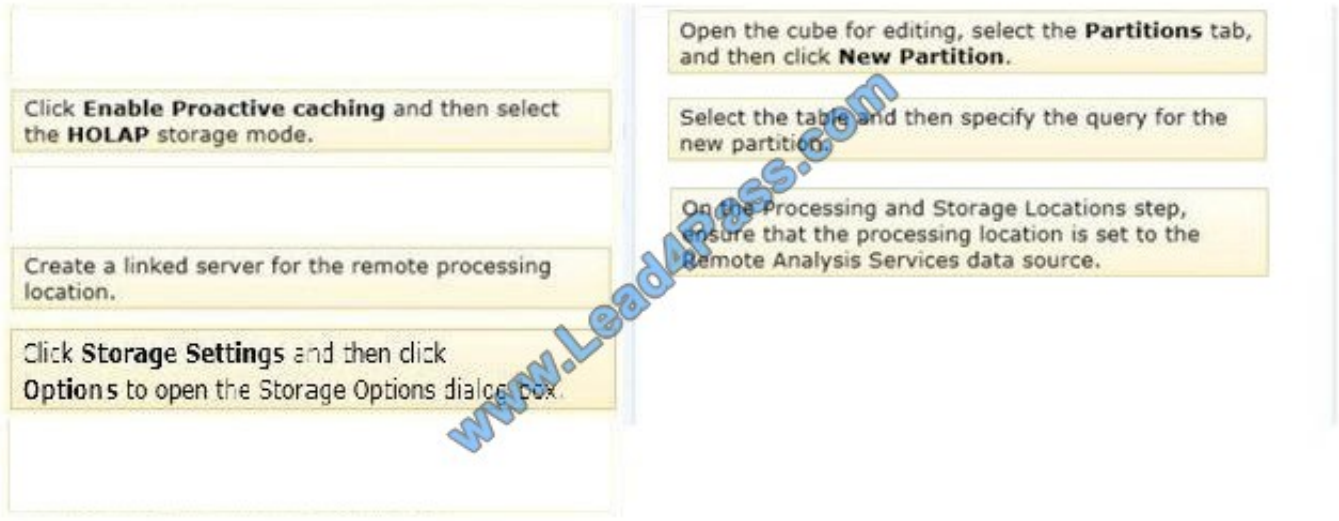
You need to create a new partition and configure SQL Server Analysis Services (SSAS) to use a remote server to process data contained within the partition.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:



Correct Answer:



**QUESTION 4**

You need to grant appropriate permissions to the SSISOwners SQL Server login. What should you do?

A. Map the login to the msdb database. Assign the user to the db_owner role.

B. Map the login to the msdb database. Assign the user to the ssis_admin role.

C. Map the login to the SSISDB database. Assign the user to the db.ssisadmin role.

D. Map the login to the SSISDB database. Assign the user to the db_owner role.

E. Map the login to the SSISDB database. Assign the user to the ssis.admin role.

F. Map the login to the msdb database. Assign the user to the db_ssisadmin role.

Correct Answer: E

**QUESTION 5**

You are designing a subscription strategy for a SQL Server Reporting Services (SSRS) report. You have an application that populates a table with user-specific subscription schedules and report formats.

You need to ensure that users can receive reports by email according to their preferences. Email messages will be sent via an internal mail server.

What should you do? (More than one answer choice may achieve the goal. Select the BEST answer.)

A. Create a standard SSRS subscription for each record in the table.

B. Create a standard SSRS subscription for each subscription schedule.

C. Create one data-driven SSRS subscription. Schedule the subscription to frequently retrieve user preferences.

D. Create a data-driven SSRS subscription for each record in the schedule table.

Correct Answer: C
