QUESTION 1

Your company has several line-of-business applications. The applications use a server that has SQL Server installed and contains several databases.

You need to ensure that the business applications can access curated and validated data from the databases.

Which features should you deploy to the server?

- A. SQL Server Integration Services (SSIS)
- B. Master Data Services (MDS) subscription
- C. Data Quality Services (DQS)
- D. SQL Server Analysis Services (SSAS) dimension hierarchies

Correct Answer: C

QUESTION 2

You work as a senior database developer at ABC.com. The ABC.com network consists of a single domain named ABC.com. ABC.com makes use of Microsoft SQL Server 2012 in their environment.

You are running a training exercise for Microsoft SQL Server 2012 junior developers. You are discussing a utility that can be run from the command prompt to manage SQL Server Integration Services packages.

Which of the following is the utility you are discussing?

- A. dbimpexp.exe
- B. dtutil.exe
- C. gacutil.exe
- D. dtexecui.exe

Correct Answer: B

QUESTION 3

You are developing a SQL Server Integration Services (SSIS) package. An Execute SQL task in the package checks product stock levels and sets a package variable named InStock to TRUE or FALSE depending on the stock level found.

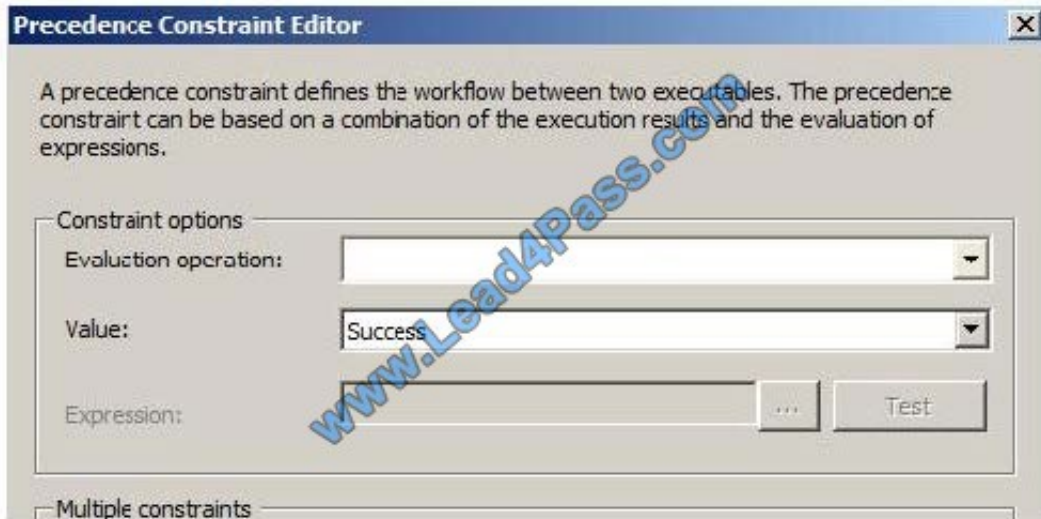

After the successful execution of the Execute SQL task, one of two data flow tasks must run, depending on the value of the InStock variable.

You need to set the precedence constraints.

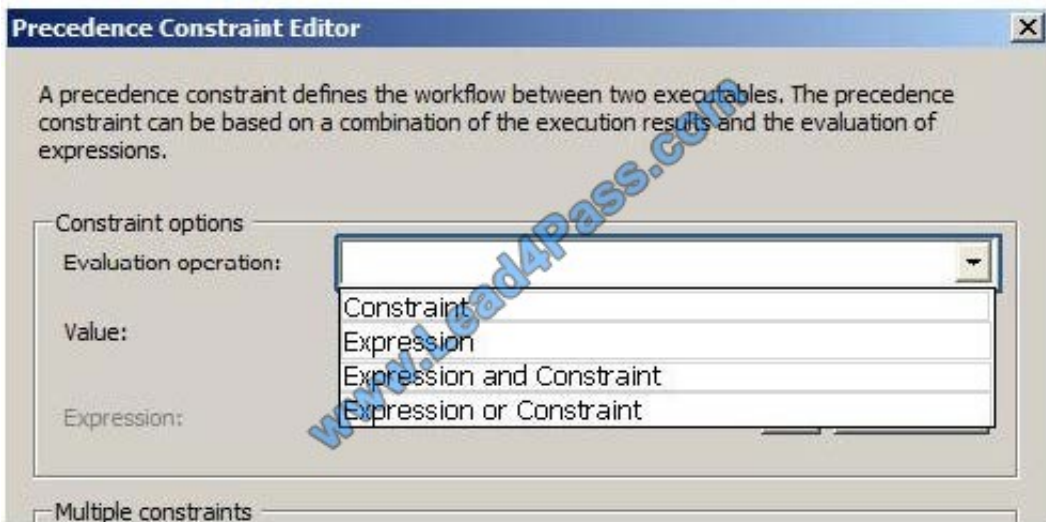

Which value for the evaluation operation should you use? (To answer, select the appropriate option for the evaluation

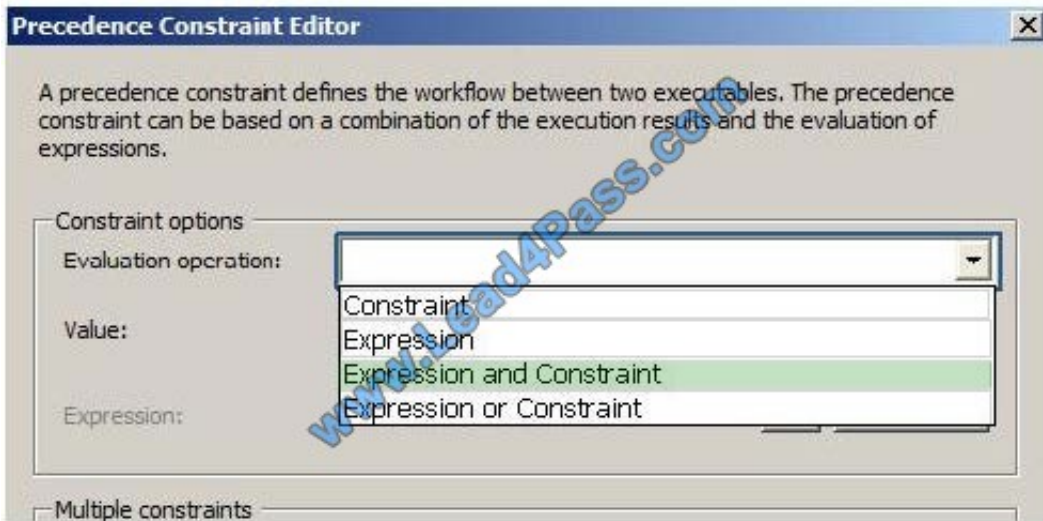

operation in the answer area.)

Hot Area:

Correct Answer:

QUESTION 4

You work as a senior database administrator at ABC.com. The ABC.com network consists of a single domain named ABC.com. ABC.com makes use of Microsoft SQL Server 2012 in their environment.

ABC.com has a SQL Server Integration Services (SSIS) package that is currently deployed on the file system. The package is configured to interact work together with an outside vendor data feed. It has been reported that the outside vendor

data feed is erratic as a result of network failures and slow response times. You have been instructed to investigate the problem. Your solution must include information about the Start Time, End Time, Execution Result, and Execution

Duration of the package.

You start by creating a new project and adding the package to it. You then deployed the package to the msdb database.

Which of the following actions should you take NEXT?

- A. You should consider querying the ExecutionLog table.
- B. You should consider viewing the SSISDB catalog.
- C. You should consider viewing the SQL Agent Error Log.
- D. You should consider viewing the SQL Server Log.

Correct Answer: A

QUESTION 5

You are developing a SQL Server Integration Services (SSIS) package.

The package sources data from an HTML web page that lists product stock levels.

You need to implement a data flow task that reads the product stock levels from the HTML web page.

Which data flow source should you use?

- A. XML source
- B. Custom source component
- C. Flat File source
- D. Raw File source

Correct Answer: B

Integration Services can extract and transform data from a wide variety of sources. You can extract data from flat files, XML files, Microsoft Excel workbooks, and files that contain raw data. You can also extract data by accessing tables and views in databases and by running queries. You can also write custom sources.
